## INTELLIGENT DIGITAL DISK RECORDER

### User Manual — Front Panel mode —

17 September, 2009

## Cautions

- (1) It is prohibited to copy a part or all of this product without prior permission.
- (2) The contents or specifications of this product may be changed without prior notice.
- (3) We have prepared the contents of this product to the best of our ability; however if you have any questions about the contents, or if there are any errors or missing items, please contact Grass Valley.
- (4) However we do not take any responsibility for malfunctions arising from use, irrespective of the points outlined in (3).
- (5) Irrespective of whether it was due to a usage error, Grass Valley takes no responsibility for extraordinary, incidental or derivative claims, including those for lost earnings generated by the application of this product.
- (6) It is prohibited to analyze, reverse engineer, decompile or disassemble any of the items included with this product, including the software, hardware and manual.
- (7) Microsoft and Windows are registered trademarks of the Microsoft Corporation, USA.
- (8) DVCPRO HD is the trademark of the Panasonic Corporation.
- (9) HDV and HDV logos are the trademarks of Sony Corporation and Victor Company of Japan, Limited (JVC).
- (10) Other product names or related brand names are trademarks or registered trademarks of their respective companies.

## About this manual

- The screens used as examples in this manual are those of the development stage, so they may vary from those in the final product.
- If there are any variations between the explanation in this manual and the actual application method, priority is given to the actual application method.
- This manual is written for people who have a basic knowledge of how to use a computer. If there are no special instructions, perform the same operation as a normal computer operation.
- In this manual, the system of the T2 is called "Workstation".

## Warning

- Health precautions

In rare cases, flashing lights or stimulation from the bright light of a computer display or TV monitor may trigger temporary epileptic seizures or loss of consciousness. It is believed that even individuals whom have never experienced such symptoms may be susceptible. If you or close relatives have experienced any of these symptoms, consult a doctor before using this product.

## Microsoft Software License Terms for:

### Windows XP Embedded and Windows Embedded Standard Runtime

These license terms are an agreement between you and Thomson Canopus. Please read them. They apply to the software included on this device. The software also includes any separate media on which you received the software.

The software on this device includes software licensed from Microsoft Corporation or its affiliate.

The terms also apply to any Microsoft

- Updates,
- Supplements,
- Internet-based services, and
- Support services

for this software, unless other terms accompany those items. If so, those terms apply. If you obtain updates or supplements directly from Microsoft, then Microsoft, and not *Thomson Canopus*, licenses those to you.

**As described below, using some features also operates as your consent to the transmission of certain standard computer information for Internet-based services.**

**By using the software, you accept these terms. If you do not accept them, do not use or copy the software. Instead, contact Thomson Canopus to determine its return policy for a refund or credit.**

If you comply with these license terms, you have the rights below.

**1. Use Rights.**

You may use the software on the device with which you acquired the software.

**2. Additional Licensing Requirements and/or Use Rights.**

a. **Specific Use.** Thomson Canopus designed this device for a specific use. You may only use the software for that use.

b. **Other Software.** You may use other programs with the software as long as the other programs

- Directly support the manufacturer’s specific use for the device, or
- Provide system utilities, resource management, or anti-virus or similar protection.

Software that provides consumer or business tasks or processes may not be run on the device. This includes email, word processing, spreadsheet, database, scheduling and personal finance software. The device may use terminal services protocols to access such software running on a server.

c. **Device Connections.**

- You may use terminal services protocols to connect the device to another device running business task or processes software such as email, word processing, scheduling or spreadsheets.
- You may allow up to ten other devices to access the software to use
  - File Services,
  - Print Services,
  - Internet Information Services, and
  - Internet Connection Sharing and Telephony Services.

The ten connection limit applies to devices that access the software indirectly through “multiplexing” or other software or hardware that pools connections. You may use unlimited inbound connections at any time via TCP/IP.

**3. Scope of License.** The software is licensed, not sold. This agreement only gives you some rights to use the software. Thomson Canopus and Microsoft reserve all other rights. Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. In doing so, you must comply with any technical limitations in the software that allow you to use it only in certain ways. For more information, see the software documentation or contact *Thomson Canopus*. Except and only to the extent permitted by applicable law despite these limitations, you may not:

- Work around any technical limitations in the software;
- Reverse engineer, decompile or disassemble the software;
- Make more copies of the software than specified in this agreement;
- Publish the software for others to copy;
- Rent, lease or lend the software; or
- Use the software for commercial software hosting services.

Except as expressly provided in this agreement, rights to access the software on this device do not give you any right to implement Microsoft patents or other Microsoft intellectual property in software or devices that access this device.

You may use remote access technologies in the software such as Remote Desktop to access the software remotely from another device. You are responsible for obtaining any licenses required for use of these protocols to access other software.

- **Remote Boot Feature.** If the Thomson Canopus enabled the device Remote Boot feature of the software, you may
  - (i) use the Remote Boot Installation Service (RBIS) tool only to install one copy of the software on your server and to deploy the software on licensed devices as part of the Remote Boot process; and
  - (ii) use the Remote Boot Installation Service only for deployment of the software to devices as part of the Remote Boot process; and
  - (iii) download the software to licensed devices and use it on them.

For more information, please refer to the device documentation or contact *Thomson Canopus*.

- **Internet-Based Services.** Microsoft provides Internet-based services with the software. Microsoft may change or cancel them at any time.

- a. **Consent for Internet-Based Services.** The software features described below connect to Microsoft or service provider computer systems over the Internet. In some cases, you will not receive a separate notice when they connect. You may switch off these features or not use them. For more information about these features, visit

<http://www.microsoft.com/windowsxp/downloads/updates/sp2/docs/privacy.msp>.

**By using these features, you consent to the transmission of this information.** Microsoft does not use the information to identify or contact you.

- b. **Computer Information.** The following features use Internet protocols, which send to the appropriate systems computer information, such as your Internet protocol address, the type of operating system, browser and name and version of the software you are using, and the language code of the device where you installed the software. Microsoft uses this information to make the Internet-based services available to you.

- **Web Content Features.** Features in the software can retrieve related content from Microsoft and provide it to you. To provide the content, these features send to Microsoft the type of operating system, name and version of the software you are using, type of browser and language code of the device where the software was installed. Examples of these features are clip art, templates, online training, online assistance and Appshelp. These features only operate when you activate them. You may choose to switch them off or not use them.
- **Digital Certificates.** The software uses digital certificates. These digital certificates confirm the identity of Internet users sending X.509 standard encrypted information. The software retrieves certificates and updates certificate revocation lists. These security features operate only when you use the Internet.
- **Auto Root Update.** The Auto Root Update feature updates the list of trusted certificate authorities. You can switch off the Auto Root Update feature.
- **Windows Media Player.** When you use Windows Media Player, it checks with Microsoft for
  - Compatible online music services in your region;
  - New versions of the player; and
  - Codecs if your device does not have the correct ones for playing content. You can switch off this feature. For more information, go to:  
<http://microsoft.com/windows/windowsmedia/mp10/privacy.aspx>.
- **Windows Media Digital Rights Management.** Content owners

use Windows Media digital rights management technology (WMDRM) to protect their intellectual property, including copyrights. This software and third party software use WMDRM to play and copy WMDRM-protected content. If the software fails to protect the content, content owners may ask Microsoft to revoke the software's ability to use WMDRM to play or copy protected content. Revocation does not affect other content. When you download licenses for protected content, you agree that Microsoft may include a revocation list with the licenses. Content owners may require you to upgrade WMDRM to access their content. Microsoft software that includes WMDRM will ask for your consent prior to the upgrade. If you decline an upgrade, you will not be able to access content that requires the upgrade. You may switch off WMDRM features that access the Internet. When these features are off, you can still play content for which you have a valid license.

- c. **Misuse of Internet-based Services.** You may not use these services in any way that could harm them or impair anyone else's use of them. You may not use the services to try to gain unauthorized access to any service, data, account or network by any means.
4. **Windows Update Agent (also known as Software Update Services).** The software on the device includes Windows Update Agent ("WUA") functionality that may enable your device to connect to and access updates ("Windows Updates") from a server installed with the required server component. Without limiting any other disclaimer in this Microsoft Software License Terms or any EULA accompanying a Windows Update, you acknowledge and agree that no warranty is provided by MS, Microsoft Corporation or their affiliates with respect to any Windows Update that you install or attempt to install on your device.
5. **Product Support.** Contact Thomson Canopus for support options. Refer to the support number provided with the device
6. **Backup Copy.** You may make one backup copy of the software. You may use it only to reinstall the software on the device.
7. **Proof Of License.** If you acquired the software on the device, or on a disc or other media, a genuine Certificate of Authenticity label with a genuine copy of the software identifies licensed software. To be valid, this label must be affixed to the device, or included on or in Thomson Canopus's software packaging. If you receive the label separately, it is not valid. You should keep the label on the device or packaging to prove that you are licensed to use the software. To identify genuine Microsoft software, see <http://www.howtotell.com>.
8. **Transfer to a Third Party.** You may transfer the software only with the device, the Certificate of Authenticity label, and these license terms directly to a third party. Before the transfer, that party must agree that these license terms apply to the transfer and use of the software. You may not retain any copies of the software including the backup copy.

9. **Not Fault Tolerant.** The software is not fault tolerant. Thomson Canopus installed the software on the device and is responsible for how it operates on the device.
10. **Restricted Use.** The Microsoft software was designed for systems that do not require fail-safe performance. You may not use the Microsoft software in any device or system in which a malfunction of the software would result in foreseeable risk of injury or death to any person. This includes operation of nuclear facilities, aircraft navigation or communication systems and air traffic control.
11. **No Warranties for the Software.** The software is provided “as is”. You bear all risks of using it. Microsoft gives no express warranties, guarantees or conditions. Any warranties you receive regarding the device or the software do not originate from, and are not binding on, Microsoft or its affiliates. When allowed by your local laws, Thomson Canopus and Microsoft exclude implied warranties of merchantability, fitness for a particular purpose and non-infringement.
12. **Liability Limitations.** You can recover from Microsoft and its affiliates only direct damages up to two hundred fifty U.S. Dollars (U.S. \$250.00). You cannot recover any other damages, including consequential, lost profits, special, indirect or incidental damages.

This limitation applies to:

- Anything related to the software, services, content (including code) on third party internet sites, or third party programs; and
- Claims for breach of contract, breach of warranty, guarantee or condition, strict liability, negligence, or other tort to the extent permitted by applicable law.

It also applies even if Microsoft should have been aware of the possibility of the damages. The above limitation may not apply to you because your country may not allow the exclusion or limitation of incidental, consequential or other damages.

13. **Export Restrictions.** The software is subject to United States export laws and regulations. You must comply with all domestic and international export laws and regulations that apply to the software. These laws include restrictions on destinations, end users and end use. For additional information, see [www.microsoft.com/exporting](http://www.microsoft.com/exporting).

# Setup

## Overview

The T2 is a multi-channel digital video recorder that allows simultaneous recording and playback of media stored on internal disk drives. The T2 features a single recording channel (R1) and two playback channels (P1/P2). The quantity of hours recorded depends on the video compression settings that are selected. The front panel touch screen and TFT display, along with front panel transport controls, allow easy operation and monitoring with minimal external connections.

With the Jog/Shuttle or the external controllers, variable speed playback is available.

## Features

- Supporting a high quality "Canopus HQ Codec", the T2 can handle videos in full resolution (1920x1080), 4:2:2 color space, and up to 200Mbps.
- The T2 can load and play HQ videos edited on Grass Valley EDIUS, without any additional encoding.
- Equipped with 1 input line and 2 HD/SD-SDI output lines, recording and playback are available simultaneously, as well as playbacks with the 2 output channels perfectly synchronized.
- Supports RS-422A deck controls.
- Supports remote controls via GPI.
- Equipped with a 7-inched touch screen LCD and a jog/shuttle knob, the T2 can be operated as a stand-alone unit.
- Supports file import in various formats including QuickTime\* and Windows Media.

\* QuickTime is not supported in some codecs.

# Part names and functions

## Front panel

<b>Touch screen LCD</b>	Displays the T2 screens. By touching on the items displayed on screen, T2 can be operated.
<b>DVD-ROM drive</b>	Used to import video/audio media files stored on DVD-ROM. * Does not support DVD-Video playback.
<b>Power switch</b>	Turns on/off the T2.
<b>USB ports</b>	Used to connect USB removable devices.
<b>IEEE1394 port</b>	Used to connect IEEE1394 removable devices. * Does not support the connection of DV/HDV devices.
<b>Volume control</b>	Used to adjust the headphone volume.
<b>Headphone jack</b>	Used to connect a headphone.
<b>Jog/Shuttle</b>	(See next page)
<b>Control buttons</b>	(See next page)

## Control buttons

<b>R1 button</b>	Switches the Recorder channel to active.
<b>P1 button</b>	Switches the Player1 channel to active.
<b>P2 button</b>	Switches the Player2 channel to active.
<b>Rew button</b>	Moves back frame by frame. Keep pressing the button will fast-rewind.
<b>Play button</b>	Starts playback.
<b>FF button</b>	Moves forward frame by frame. Keep pressing the button will fast-forward.
<b>Stop button</b>	Stops playback/recording.
<b>Rec button</b>	Starts recording.
<b>Shuttle/Jog button</b>	Makes Jog/Shuttle active. (Switches modes from <b>VAR</b> button.)
<b>VAR button</b>	Executes variable speed playback. (Opens the control screen. Switches modes from <b>Shuttle/Jog</b> button.)
<b>Jog/Shuttle</b>	Executes jog playback, shuttle playback.
<b>Rew + Stop buttons</b>	While playing a clip Moves to the previous IN/OUT point, or the top of the clip. While playing a playlist Moves to the previous event.
<b>FF + Stop buttons</b>	While playing a clip Moves to the next IN/OUT point, or the end of the clip. While playing a playlist Moves to the next event.

## Rear panel

<b>AC Power inlet (3 pin)</b>	Use the supplied power cable and connect to the AC power.
<b>Main power switch</b>	Turns the main power ON/OFF.
<b>Analog audio I/O section</b>	Used for analog audio I/O.
<b>Mouse port (PS/2)</b>	Used to connect a mouse.
<b>Keyboard port (PS/2)</b>	Used to connect a keyboard.
<b>Serial port</b>	Not used.
<b>Monitor port</b>	Used to connect a PC monitor.
<b>USB (2.0)</b>	Used to connect a keyboard or mouse.
<b>LAN</b>	Used to connect a LAN cable.
<b>Sound</b>	Not used.
<b>R1 input section</b>	Used for inputting to the R1 channel.
<b>P1 output section</b>	Used for outputting from the P1 channel.
<b>P2 output section</b>	Used for outputting from the P2 channel.
<b>REF IN</b>	Used to input REF signal.
<b>GPI I/O</b>	Used for GPI I/O.
<b>IEEE1394</b>	Used to connect a device via IEEE1394.
<b>MONITOR</b>	Used for audio monitor.
<b>REMOTE RS422</b>	Used for remote control of R1, P1, P2 channels.

## Analog audio I/O section

<b>R1 – CH1</b> <b>R1 – CH2</b>	Used for audio input to the R1 channel. Balanced audio input. XLR-3-31x2 (CH1-2)
<b>P1 – CH1</b> <b>P1 – CH2</b>	Used for audio output from the P1 channel. Balanced audio output. XLR-3-32x2 (CH1-2)
<b>P2 – CH1</b> <b>P2 – CH2</b>	Used for audio output from the P2 channel. Balanced audio output. XLR-3-32x2 (CH1-2)

## R1 input section

<b>LTC</b>	Used for LTC (timecode) input.
<b>AES/EBU</b>	Used for digital audio (AES/EBU) input.
<b>CMPST</b>	Used for Composite input.
<b>DVI-I</b>	Used for DVI-I input (for DVI, YPbPr).
<b>SDI</b>	Used for SDI input (left), and for active through (right).

## P1/P2 output section

<b>LTC</b>	Used for LTC (timecode) output.
<b>AES/EBU</b>	Used for digital audio (AES/EBU) output.
<b>CMPST</b>	Used for Composite output.
<b>DVI-I</b>	Used for DVI-I output (for DVI, RGB, YPbPr).
<b>SDI</b>	Used for SDI output.
<b>MONITOR</b>	Used for monitor output (Composite).

**Note** The YPbPr signal is input/output via analog RGB pins on the DVI-I port. To output YPbPr, use a RGB conversion connector cable.

# Start-up and shutdown

## Start-up

The following procedure is to start-up the T2.

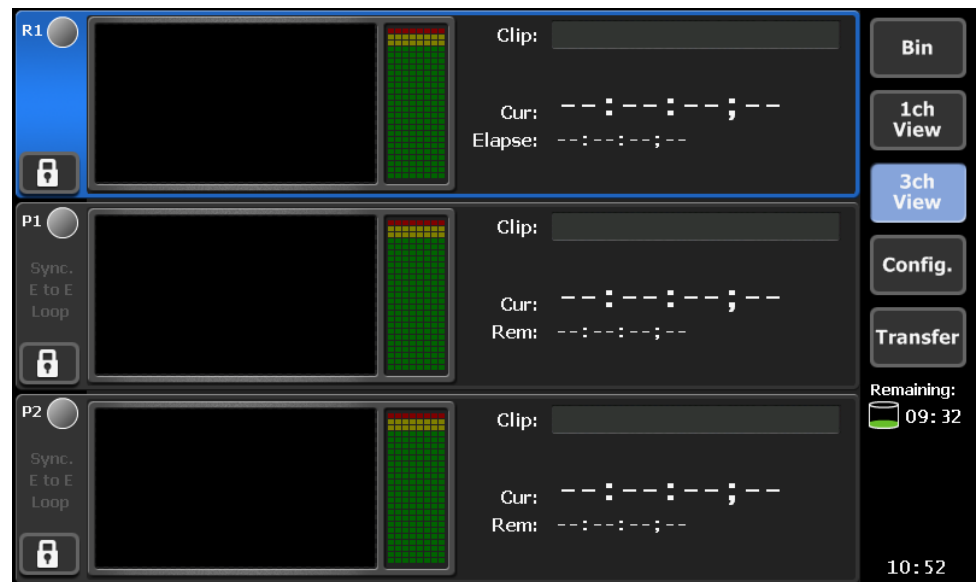

1. Switch the Main power switch on the rear panel to the on position, and turn the Power switch on the front panel ON.

Power switch

2. T2 starts up and the 3ch View screen appears on the touch screen LCD.

3ch View

## Shutdown

The following procedure is to shutdown the T2.

1. Switch the screen to the 1ch View, and touch the **Menu** button.

Menu button (R1 channel)

2. From the text menu, choose **Tools – Exit**.
3. On the dialog displayed, choose **Shutdown** and touch the **OK** button.

To turn the T2's main power off, wait until the screen goes blank, confirm that the shutdown is complete, and then turn off the main power switch on the rear panel.

# Hardware settings

Touching the **Config** button shown on the screen, the General settings screen will open.

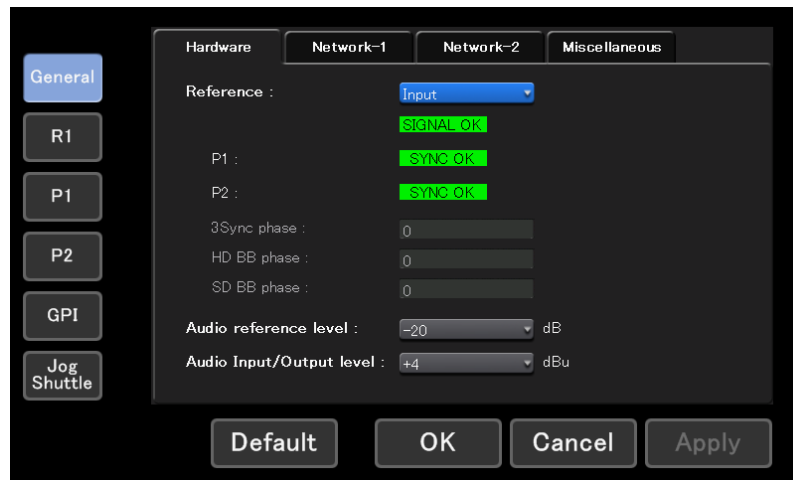

Modify the settings according to your environment.

Config button

## General settings

### Hardware tab

<p><b>Reference</b></p>	<p>The options you can choose from for the reference input method are <b>External</b>, <b>Input</b> and <b>Internal</b>. The sync status is displayed in the boxes below this button.</p> <ul style="list-style-type: none"> <li>• P1 ..... Displays if the P1 channel is synchronized.</li> <li>• P2 ..... Displays if the P2 channel is synchronized.</li> <li>• 3Sync phase... To use the HD tri-level REF signal as the HD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b>)</li> <li>• HD BB phase... To use the HD Black Burst REF signal as the HD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b>)</li> <li>• SD BB phase... To use the SD Black Burst REF signal as the SD REF signal, check this box. Enter a value to adjust the REF phase. (Available only for <b>External</b>)</li> </ul>
<p><b>Audio reference level</b></p>	<p>Adjusts the audio reference level (Headroom).</p>
<p><b>Audio Input/Output level</b></p>	<p>Adjusts the audio input/output level.</p>

## Network-1/Network-2 tab

<b>Obtain an IP address automatically</b>	Check this option to obtain an IP address automatically via DHCP.
<b>Use the following IP address</b>	Establishes a local area connection by specifying an IP address, subnet mask and default gateway. <b>IP address</b> Specify an IP address. <b>Subnet mask</b> Specify a subnet mask. <b>Default gateway</b> Specify a default gateway.
<b>Obtain DNS server address automatically</b>	Check this option to obtain a DNS server address automatically via DHCP.
<b>Use the following DNS server addresses</b>	Establishes a local area connection by specifying addresses for the default DNS server and an alternate DNS server. <b>Preferred DNS server</b> Specify a default DNS server address. <b>Alternate DNS server</b> Specify a default DNS server address.

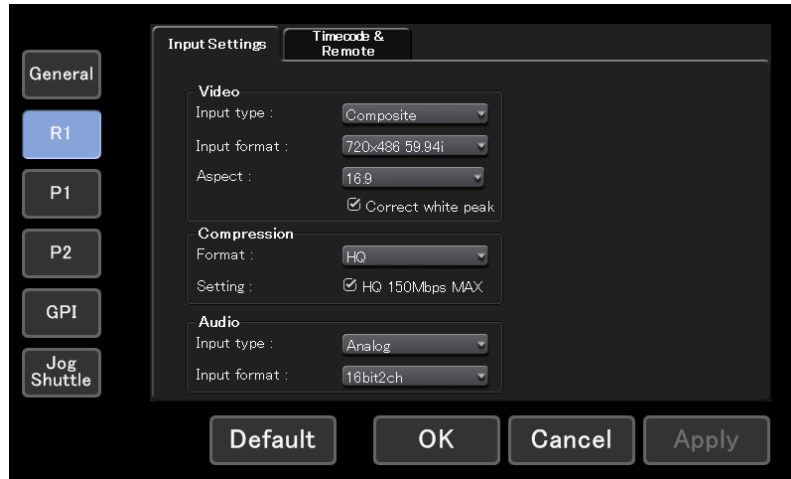

## Miscellaneous tab

<b>Language</b>	Choose between <b>English</b> and <b>Japanese</b> for the on-screen language. * Restarting the system is required to apply the setting.
<b>DF mode</b>	Specify either drop-frame or non-drop frame to be used. <b>DF</b> Check this option to use Drop frame. <b>NDF</b> Check this option to use Non-drop frame.
<b>Playlist AutoScroll</b>	Specify if you want the Event List of the playlist to automatically scroll.

## R1 channel settings

### Input Settings tab

<p><b>Video</b></p>	<p><b>Input type</b> Choose a type of video input.</p> <p><b>Input format</b> Choose a format for the video input.</p> <p><b>Aspect</b> Choose the aspect ratio for the SD input.</p> <p><b>Correct white peak</b> Check this option to enable white peak correction.</p>
<p><b>Compression</b></p>	<p><b>Format</b> Specify the compression format.</p> <p><b>Setting</b> Check this option to limit the compression rate for the Canopus HQ codec, up to 150Mbps.</p>
<p><b>Audio</b></p>	<p><b>Input type</b> Specify the audio input format from <b>Analog</b>, <b>AES/EBU</b> (digital) and <b>SDI embedded</b>.</p> <p><b>Input format</b> Check this option to record in 16bit 2ch.</p>

## Timecode & Remote tab

<b>Select Timecode</b>	Specify the format for the timecode from <b>TC (LTC)</b> and <b>SDI (VITC)</b> .
<b>Record Timecode</b>	Choose the timecode to use for recording. <b>External</b> Uses the timecode from the external device. <b>Internal-System time</b> Uses the system clock. <b>Internal-Specified start TC</b> Specify a value as the beginning timecode.
<b>Record ancillary data</b>	Setting this option to ON will record VANC.
<b>Remote protocol</b>	Choose a REMOTE protocol from <b>BVW</b> and <b>AMP</b> .
<b>AMP Connection</b>	Specify an IP address and a channel for AMP connection.

## P1/P2 channel settings

### Video tab

<b>Format</b>	Specify the resolution and the frame rate for the output video.
<b>DVI option</b>	Choose a video resolution to use with DV/RGB format for output.
<b>Output capability</b>	Displays available format with highlight.
<b>Aspect</b>	Specify the aspect ratio. Choose <b>4:3</b> or <b>16:9</b> for SD video.
<b>Component type</b>	Choose the type of the analog signal output via DVI-I port.
<b>Pedestal</b>	Choose the setup (black) level in NTSC. Choose <b>7.5IRE</b> for North America.

## Monitor & Remote tab

<p><b>Monitor out</b></p>	<p>Specify the channel to use for monitor out, and specify if OSD (on-screen display) is enabled.</p> <p><b>Channel</b> Specify the channel to use for monitor out. Only <b>P1</b> is available for <b>P1</b> channel, while <b>P1</b> and <b>P2</b> for <b>P2</b> channel.</p> <p><b>OSD</b> Enables/Disables the on-screen display.</p>
<p><b>Remote protocol</b></p>	<p>Choose a REMOTE protocol from <b>BWV</b> and <b>AMP</b>.</p>

## ProcAmp tab

<b>Video gain</b>	Adjusts the Video gain. (Available only for Composite and SD Component)
<b>Chroma gain</b>	Adjusts the Chroma gain. (Available only for Composite and SD Component)
<b>Chroma phase</b>	Adjusts the Chroma phase. (Available only for Composite)
<b>Black level</b>	Adjusts the Black level. (Available only for Composite and SD Component)
<b>Video output level</b>	Adjusts the Video output level. (Available only for Composite and Component)

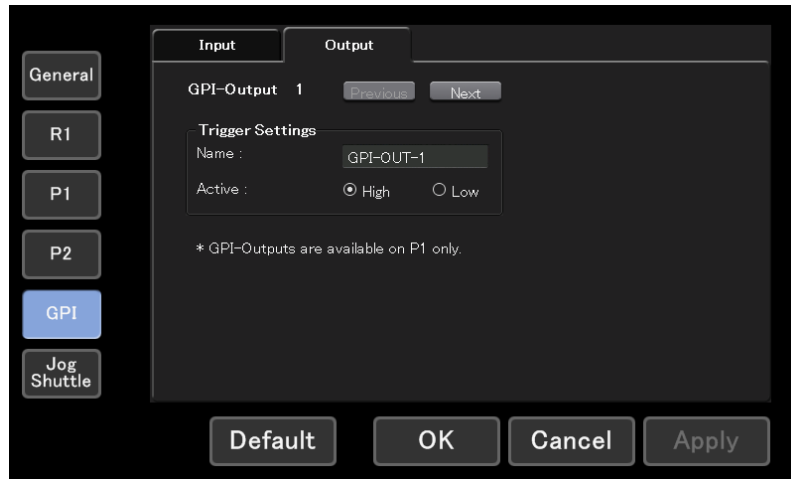

## GPI settings

### Input tab

<b>GPI-Input</b>	Use the <b>Previous</b> and <b>Next</b> buttons to choose the GPI input trigger.
<b>Trigger Settings</b>	<p>Permits specification of the GPI input trigger settings.</p> <p><b>Channel</b> Choose a channel to respond to the GPI input trigger.</p> <p><b>Action</b> Specify the action caused by the trigger.</p> <ul style="list-style-type: none"> <li>• Stop ..... Stops playback/recording.</li> <li>• Play ..... Plays the clip or playlist loaded to a channel.</li> <li>• Record ..... Starts recording.</li> <li>• Rewind ..... Rewinds. Rewinding stops at the start of the content, or when other action is performed.</li> <li>• FastFwd ..... Executes Fast Forward. Fast Forward stops at the end of the content, or when other action is performed.</li> <li>• CueStart ..... Cues up to the IN point of the content loaded.</li> <li>• CueEnd ..... Cues up to the OUT point of the content loaded.</li> <li>• Eject ..... Unloads the content loaded.</li> <li>• Preview ..... Loads the clip uploaded from the R1 channel onto the P1 channel.</li> <li>• CueNextEvent ..... Cues up to the next event on the playlist loaded.</li> <li>• CuePrevEvent ..... Cues up to the previous event on the playlist loaded.</li> <li>• VARPlayback ..... Plays the content in the speed specified in Variable speed playback mode (see "Jog/Shuttle settings").</li> </ul> <p><b>Active</b> Choose the GPI signal to activate from <b>High</b> and <b>Low</b>.</p>

## Output tab

<b>GPI-output</b>	Use the <b>Previous</b> and <b>Next</b> buttons to choose the GPI output trigger.
<b>Trigger Settings</b>	Permits specification of the GPI output trigger settings. <b>Name</b> Specify the name of the trigger. <b>Active</b> Choose the GPI signal to activate from <b>High</b> and <b>Low</b> .

## Jog/Shuttle settings

<b>Shuttle speed</b>	Choose the maximum shuttle speed, either <b>16x</b> or <b>32x</b> .
<b>VAR setting</b>	Choose the playback speed in the Variable speed playback mode, between <b>1/8</b> , <b>1/4</b> and <b>1/2</b> .

# Front Panel mode

## Overview

In the Front Panel mode, you can operate the T2 through the image displayed on the touch screen LCD on the front of the T2. When the T2 is turned on, the 3ch View is displayed as the main screen. The 3ch View consists of one Recorder and two Playback channels. The Playback channel has two modes: **Clip Player** mode and **Playlist Player** mode. Touching the area where the input value is available opens the **S/W Keyboard** (for the alphabet) or the **S/W Keypad** (for inputting numbers) screen. You can input values by touching the key on the touch screen LCD.

3ch View

# 3ch View

<b>R1 channel</b>	To choose this channel, touch the header area shown on the touch screen LCD. The active channel is highlighted.
<b>P1 channel</b>	To choose this channel, touch the header area shown on the touch screen LCD. The active channel is highlighted.
<b>P2 channel</b>	To choose this channel, touch the header area shown on the touch screen LCD. The active channel is highlighted.
<b>Bin button</b>	Opens the Bin window.
<b>1ch View button</b>	Switches the screen to the 1ch View for the active channel.
<b>3ch View button</b>	Switches the screen to the 3ch View.
<b>Config button</b>	Opens the Config screen.
<b>Transfer button</b>	Opens the Transfer screen.
<b>HDD capacity</b>	Displays the estimated amount of time for recording.
<b>Clock</b>	Displays the current time.

## Recorder (R1) channel

<b>Clip</b>	Displays the clip name.
<b>Cur</b>	Displays the current timecode.
<b>Elapse</b>	Displays the elapsed time by timecode.
<b>Status</b>	Displays the status of the recording operation with a circular chart.
<b>Lock button</b>	Locks/Unlocks the channel.

## Player (P1/P2) channel (Clip Player mode)

<b>Clip</b>	Displays the clip name.
<b>Cur</b>	Displays the current timecode.
<b>Rem</b>	Displays the remaining time by timecode.
<b>Status</b>	Displays the status of the playback operation with a circular chart.
<b>Playback mode</b>	Displays the status whether Sync mode, E to E mode, or Loop mode is enabled.
<b>Lock button</b>	Locks/Unlocks the channel.

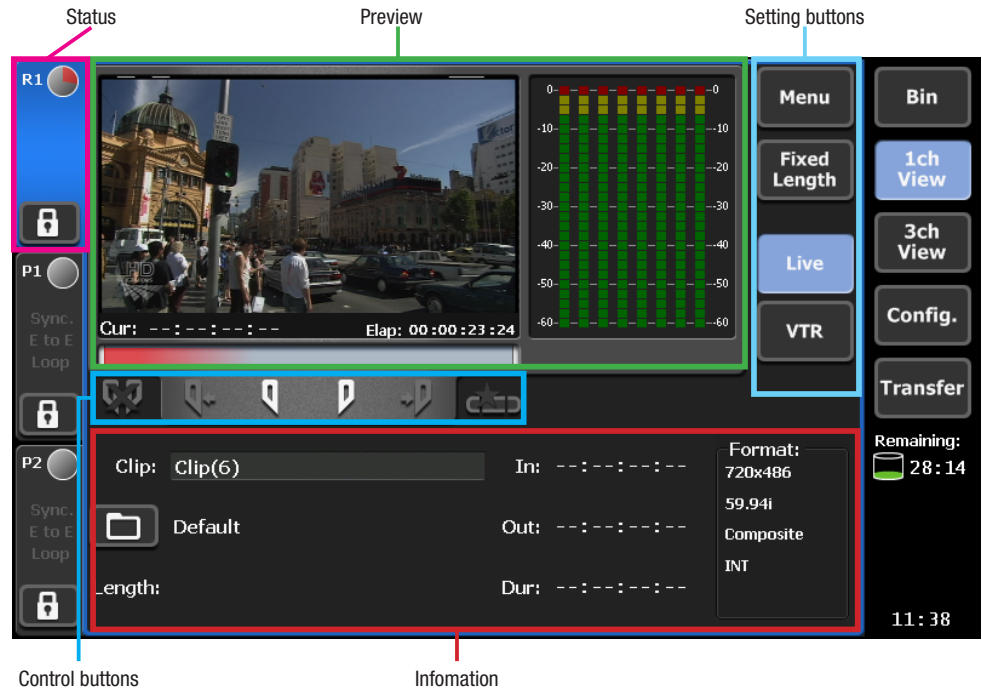

## Player (P1/P2) channel (Playlist Player mode)

<b>P.List</b>	Displays the playlist name.
<b>Now</b>	Displays the current event.
<b>Next</b>	Displays the next event.
<b>Cur</b>	Displays the current timecode.
<b>Rem</b>	Displays the remaining time by timecode.
<b>Status</b>	Displays the status of the playback operation with a circular chart.
<b>Playback mode</b>	Displays the status whether Sync mode, E to E mode, or Loop mode is enabled.
<b>Lock button</b>	Locks/Unlocks the channel.

# 1ch View — Recorder screen

On this screen, you can modify the settings for recording and/or execute the recording. When recording is in progress, other operations, with the exception of stop, are not available on the channel. When the capacity of the HDD becomes low, the HDD icon is displayed in red. In that case, a warning message appears at the beginning of the recording.

## Status

<b>Status</b>	Displays the status of the recording operation with a circular chart.
<b>Lock button</b>	Locks/Unlocks the channel.

## Preview

<b>Preview</b>	Displays the preview for the input video.
<b>Audio level</b>	Displays the input audio level.
<b>Cur</b>	Displays the current timecode.
<b>Elap</b>	Displays the elapsed recording time by timecode.
<b>Status bar</b>	Displays the recording status with a bar.

## Setting buttons

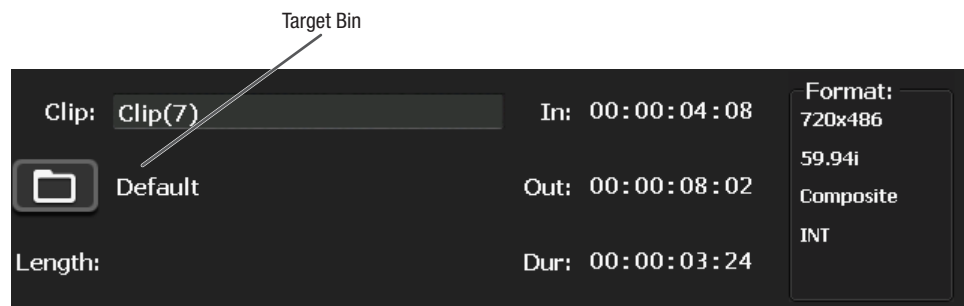

<p><b>Menu button</b></p>	<p>Displays the menu.</p> <p><b>Properties</b> Opens the clip properties dialog.</p> <p><b>Rename</b> Opens the dialog to change the current clip name.</p> <p><b>Tools</b></p> <ul style="list-style-type: none"> <li>• Maintenance..Choose this option to switch the T2 to Maintenance mode. Entering a password is required.</li> <li>• Exit.....Choose this option to restart or shutdown the T2.</li> </ul>
<p><b>Fixed Length button</b></p>	<p>Enables/Disables the Fixed Length recording mode. Setting this button to <b>ON</b> opens the dialog to specify the duration of the recording.</p>
<p><b>Control Mode button</b></p>	<p>Switches the recording mode between Live and VTR.</p> <p><b>Live</b> Records the video input from an external device as live (stream). Perform operations manually for recording. When the Fixed Length Recording is activated, the recording automatically stops when the specified period of time has passed.</p> <p><b>VTR</b> You can specify the IN/OUT points before starting recording, controlling the external VTR device from T2. To use this mode, connection to an external device via RS-422A is required.</p>

## Control buttons

<b>Clear button</b>	Clears the existing IN/OUT points.
<b>Cue (IN)</b>	Cues the VTR to the existing IN point. (Available only in VTR mode)
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box.
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box, as well as the duration of the clip in the Length box.
<b>Cue (OUT)</b>	Cues the VTR to the existing OUT point. (Available only in VTR mode)
<b>Creating sub-clip button</b>	Generates a sub-clip according to the existing IN/OUT points.

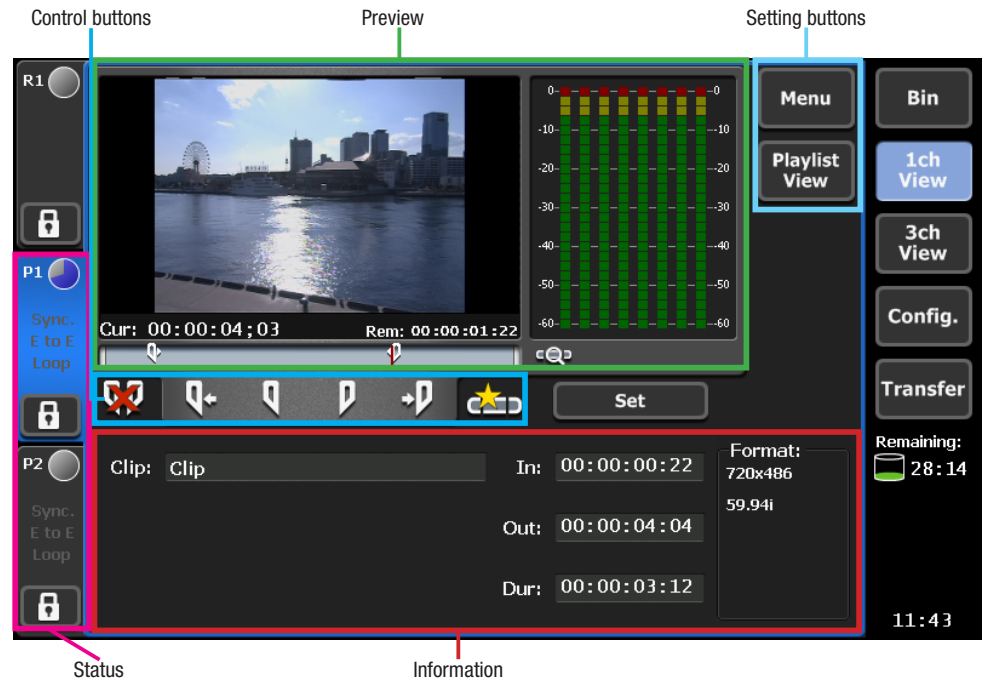

## Information

<b>Clip</b>	Input a clip name.
<b>Target Bin</b>	Displays the Bin folder where the recorded media file is stored. Touching the icon will open the dialog to change target Bins.
<b>Length</b>	Displays the duration of the clip in the Fixed Length mode.
<b>In</b>	Displays the timecode at the IN point.
<b>Out</b>	Displays the timecode at the OUT point.
<b>Dur</b>	Displays the duration of the content between the IN-OUT points by timecode.
<b>Format</b>	Displays the information including video size, frame rate, input type, source timecode (TC (LTC) / SDI (VITC) / INT), etc.

# 1ch View — Clip Player screen

On this screen, you can modify the settings for clip playback and/or execute the playback

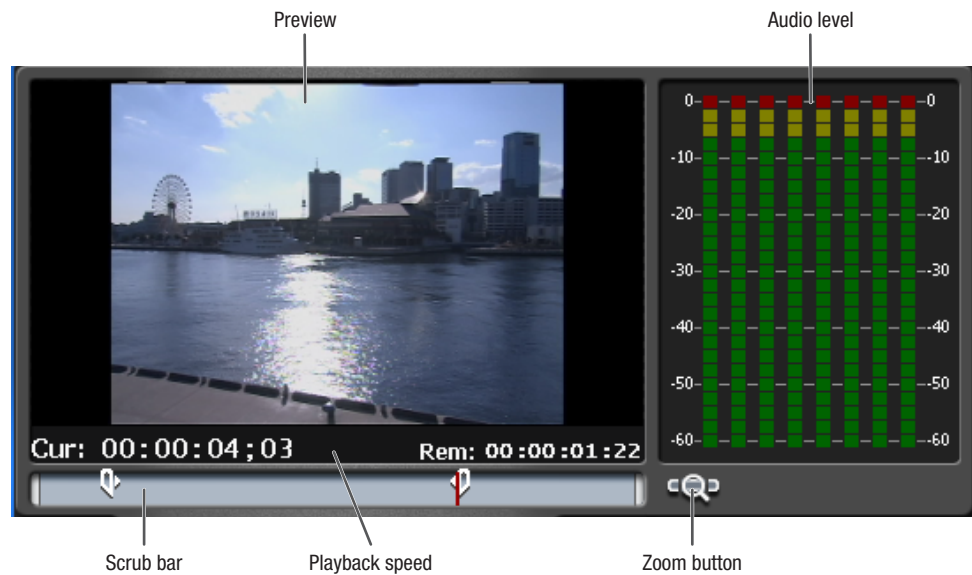

## Status

<b>Status</b>	Displays the status of the playback operation with a circular chart.
<b>Playback mode</b>	<p><b>Sync.</b> Displays whether the Sync mode is enabled.</p> <p><b>E to E</b> Displays whether the E to E mode is enabled. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no clip loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</p> <p><b>Loop</b> Displays whether the Loop mode is enabled.</p>
<b>Lock button</b>	Locks/Unlocks the channel.

## Preview

<b>Preview</b>	Displays the video preview.
<b>Audio level</b>	Displays the input audio level.
<b>Cur</b>	Displays the current timecode.
<b>Playback speed</b>	Displays the current playback speed (ratio).
<b>Rem</b>	Displays the remaining time by timecode.
<b>Scrub bar</b>	Displays the current position and the IN/OUT points.
<b>Zoom button</b>	<p>Changes the display scale on the scrub bar (Zoom On / Off).</p> <p><b>Zoom On</b>                      Displays the section between the IN-OUT points of the clip as a whole scale of the scrub bar.                      Moving the current point out of the IN-OUT range is not available.</p> <p><b>Zoom Off</b>                      Displays the entire media clip in a complete scale of the scrub bar.                      In the normal playback operations, the current position can be moved between the IN-OUT points.                      To move out of the existing IN-OUT range, perform FF, Rew, Jog/Shuttle operations after CueUp.</p>

## Setting buttons

<p><b>Menu button</b></p>	<p>Displays the menu.</p> <p><b>Unload</b> Unloads the loaded clip.</p> <p><b>Properties</b> Opens the clip properties dialog.</p> <p><b>Rename</b> Opens the dialog to change the current clip name.</p> <p><b>Now Recording</b> Loads the clip which is being recorded on the R1 channel onto one of the playback channels. (Follow-up playback)</p> <p><b>Set Thumbnail Frame</b> Changes the thumbnail of the clip with the current frame displayed.</p> <p><b>Remote</b> Enables/Disables the Remote controls. With the Remote controls set to ON, local operations will be ignored.</p> <p><b>Playout Mode</b> Enables/Disables the Sync mode, E to E mode, and Loop mode.</p> <ul style="list-style-type: none"> <li>• E to E ..... Enables/Disables the E to E mode. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no clip loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</li> <li>• Loop..... Enables/Disables the Loop mode.</li> <li>• Sync..... Enables/Disables the Sync mode. (Available only on P2 channel)</li> </ul> <p><b>Tools</b></p> <ul style="list-style-type: none"> <li>• Maintenance..... Choose this option to switch the T2 to the Maintenance mode. Entering a password is required.</li> <li>• Exit..... Choose this option to restart or shutdown the T2.</li> </ul>
<p><b>Playlist View</b></p>	<p>Switches the screen to the Playlist Player mode.</p>

## **Sync mode**

Touch the **Menu** button on the P2 channel, and choose **Sync** to activate the Sync mode. In the Sync mode, the content (clip or playlist) loaded to the P2 channel will be played in sync with the P1 channel.

When the Sync mode is activated, if the output settings of the P1 and P2 channels differ, the settings on the P2 channel are automatically changed so as to match those of the P1.

The E to E mode cannot be simultaneously activated.

In the Sync mode, only playback operations are available. Marking IN/OUT points or creating sub-clips is not available.

\* If the duration of the contents differs between P1 and P2 channels, the playback operations will be performed according to the P1 channel. (P1 channel is the master channel.) When the content loaded on the P2 channel is shorter, the final frame remains displayed.

## **Requirements for sync mode**

- Contents must be of the same type. (clip and clip or playlist and playlist). Combinations between clip and playlist are not available for pairing contents in the sync mode.
- Video format must be available and loaded on the same profile.
- Audio types do not matter.
- Contents must be specified as a pair in the Bin before loading to the channels.

## Control buttons

<b>Clear button</b>	Clears the existing IN/OUT points.
<b>Cue (IN)</b>	Cues to the existing IN point.
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box.
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box, as well as the duration of the clip in the Length box.
<b>Cue (OUT)</b>	Cues to the existing OUT point.
<b>Creating sub-clip button</b>	Generates a sub-clip according to the existing IN/OUT points.
<b>Set button</b>	Use this button to set the IN/OUT points for the clip. After marking the IN/OUT points, touch the <b>Set</b> button to update the IN/OUT points of the clip.

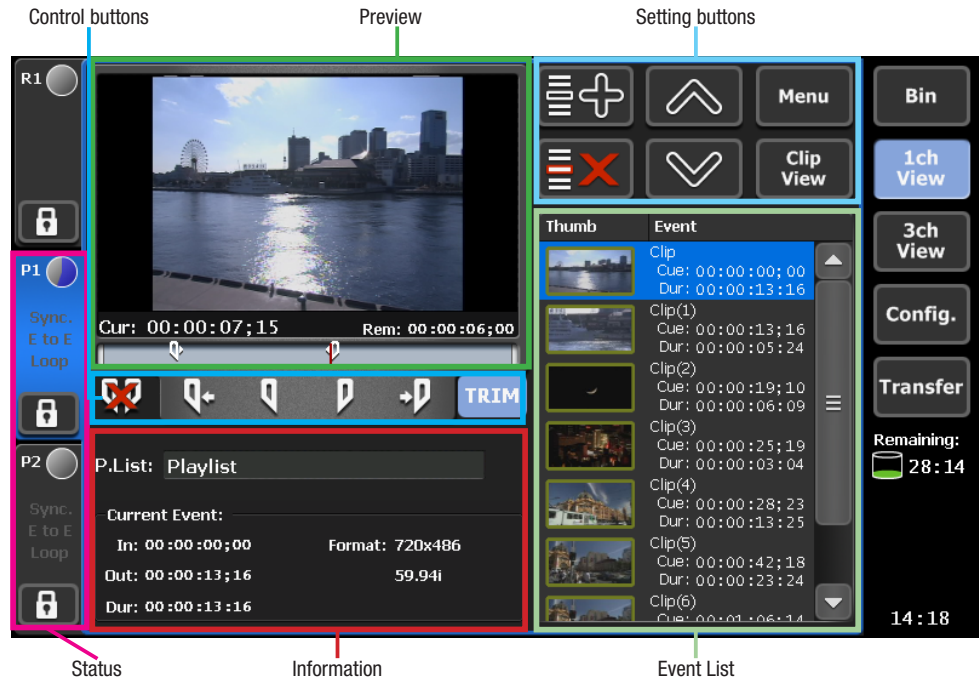

## Information

<b>Clip</b>	Displays the name of the loaded clip.
<b>In</b>	Displays the timecode at the IN point.
<b>Out</b>	Displays the timecode at the OUT point.
<b>Dur</b>	Displays the duration of the content between the IN-OUT points by timecode.
<b>Format</b>	Displays video size and frame rate of the clip.

# 1ch View — Playlist Player screen

In this screen, you can modify the playback settings for the playlist and/or execute the playback. The Event List will be automatically scrolled so that the clip being played is shown on screen. To enable/disable the auto-scroll for the Event List, touch the **Config** button, open the **Miscellaneous** tab and change the **Playlist AutoScroll** setting (Default: ON).

## Status

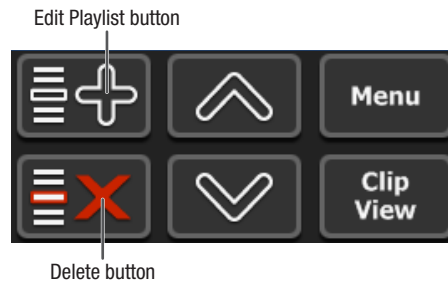

<b>Status</b>	Displays the status of the playback operation with a circular chart.
<b>Playback mode</b>	<p><b>Sync</b> Displays whether the Sync mode is enabled.</p> <p><b>E to E</b> Displays whether the E to E mode is enabled. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no playlist loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</p> <p><b>Loop</b> Displays whether the Loop mode is enabled.</p>
<b>Lock button</b>	Locks/Unlocks the channel.

## Preview

<b>Preview</b>	Displays the video preview.
<b>Cur</b>	Displays the current timecode.
<b>Playback speed</b>	Displays the current playback speed (ratio).
<b>Rem</b>	Displays the remaining time by timecode.
<b>Scrub bar</b>	Displays the current position and the IN/OUT points.

## Setting buttons

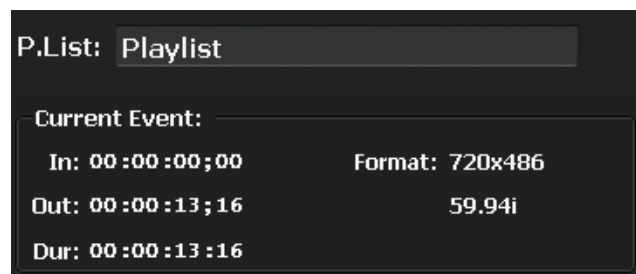

<b>Edit Playlist button</b>	Opens the Edit Playlist screen.
<b>Delete button</b>	Deletes the events selected in the Event List.
<b>UP button</b>	Moves the selected event to a position above the previous event in the list.
<b>DOWN button</b>	Moves the selected event to a position below the next event in the list.
<b>Menu button</b>	<p>Displays the menu.</p> <p><b>Unload</b> Unloads the loaded playlist.</p> <p><b>Properties</b> Opens the playlist properties dialog.</p> <p><b>Rename</b> Opens the dialog to change the current playlist name.</p> <p><b>Event Effect</b> Opens the Event Effect settings dialog for the event selected in the Event List.</p> <p><b>Event Properties</b> Opens the properties dialog for the event selected in the Event List.</p> <p><b>Remote</b> Enables/Disables Remote control. When Remote control is enabled, local operations are ignored.</p> <p><b>Playout Mode</b> Enables/Disables Sync mode, E to E mode, and Loop mode.</p> <ul style="list-style-type: none"> <li>• Sync.....Enables/Disables the Sync mode.(Available only on P2 channel)</li> <li>• E to E .....Enables/Disables the E to E mode. When the E to E mode is enabled, the recorder channel audio and video inputs are switched to the player channel audio and video outputs when the player channel is in stop mode or when there is no playlist loaded. * The video format for the channel specified to <b>E to E mode</b> must be same as that of the R1 channel.</li> <li>• Loop.....Enables/Disables the Loop mode.</li> </ul> <p><b>Tools</b></p> <ul style="list-style-type: none"> <li>• Maintenance.....Choose this option to switch the T2 to the Maintenance mode. Entering a password is required.</li> <li>• Exit.....Choose this option to restart or shutdown the T2.</li> </ul>
<b>Clip View</b>	Switches the screen to the Clip Player mode.

## Operation buttons

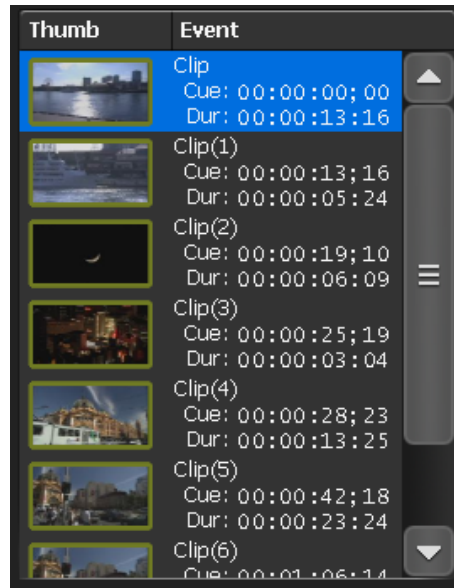

<b>Clear button</b>	Clears the existing IN/OUT points.
<b>Cue (IN)</b>	<p><b>Normally</b> Cues to the existing IN point of the current event.</p> <p><b>While editing</b> Cues to the existing IN point.</p>
<b>Mark (IN)</b>	Marks the current position as the IN point of the content. Marking an IN point will set the timecode of the IN point in the timecode box. (Available only while editing)
<b>Mark (OUT)</b>	Marks the current position as the OUT point of the content. Marking an OUT point will set the timecode of the OUT point in the timecode box. (Available only while editing)
<b>Cue (OUT)</b>	<p><b>Normally</b> Cues to the existing OUT point of the current event.</p> <p><b>While editing</b> Cues to the existing OUT point.</p>
<b>TRIM button</b>	Use this button to start editing IN-OUT points on the current event.

## Information

<b>P. List</b>	Displays the name of the loaded playlist.
<b>Current Event</b>	<p>Displays the current event.</p> <p><b>In</b> Displays the timecode at the IN point.</p> <p><b>Out</b> Displays the timecode at the OUT point.</p> <p><b>Dur</b> Displays the duration of the event by timecode.</p> <p><b>Format</b> Displays the video size, frame rate, etc.</p>

## Event List

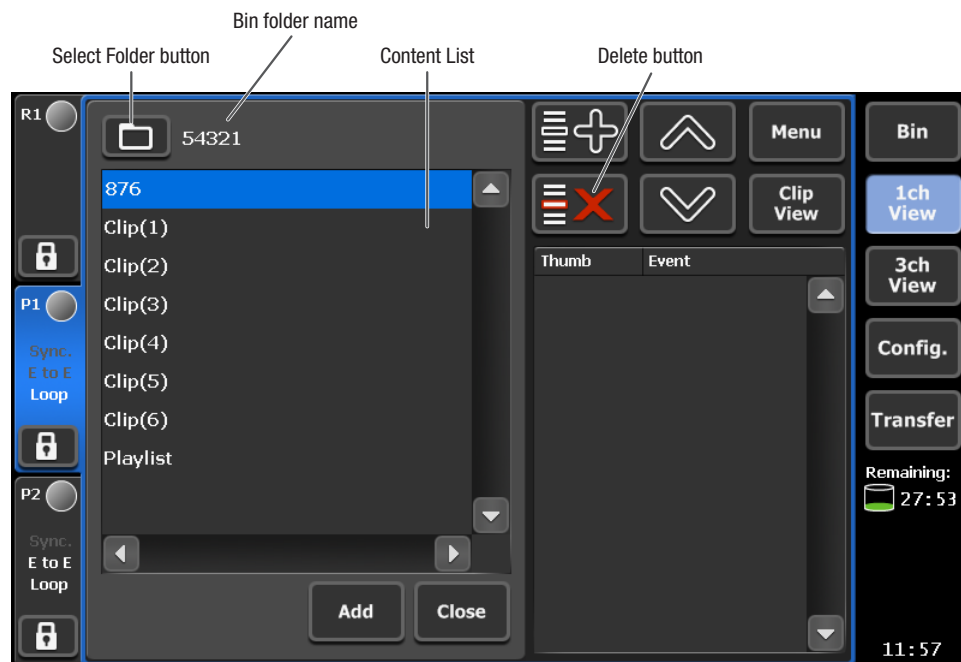

<p><b>Event List</b></p>	<p>Lists the events on the playlist. On the thumbnail of each event, icons for identifying its effect are displayed, if any. Double-touching on an event will cue to the event.</p> <p><b>Blue background</b> Current event being played</p> <p><b>Colored frame</b> Selected event</p>
--------------------------	---

## Playlist Player — Edit Playlist screen

Touching the **Edit Playlist** button on the Playlist Player screen opens the Edit Playlist screen.

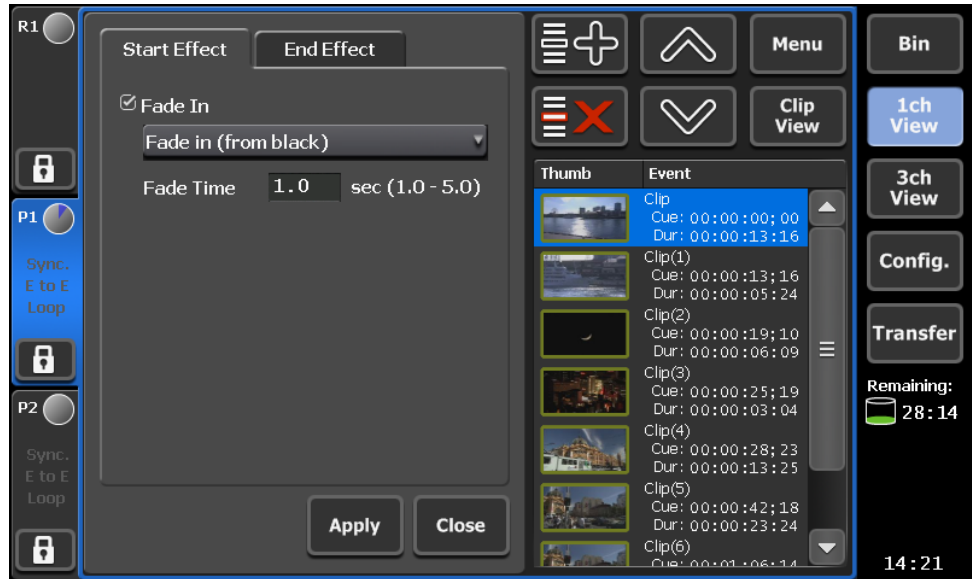

<b>Select Folder button</b>	Touching the <b>Select Folder</b> button allows you to change the Bin, listing the contents of the Bin folder in the Content List area. After choosing a folder, touching the <b>OK</b> button will change the Bin, displaying the contents of the selected folder.
<b>Bin folder name</b>	Displays the name of the Bin folder that is currently chosen.
<b>Content List</b>	Displays the contents (clip and playlist) of the Bin folder. While choosing a folder, a list of the Bin folders is displayed.
<b>Edit Playlist button</b>	Registers contents to the selected playlist. Touch the <b>Edit Playlist</b> button to display the contents stored in the Bin, and touch the <b>Add</b> button to register.
<b>Delete button</b>	Deletes the events selected on the Event List.
<b>UP button</b>	Moves the selected event above the previous event on the list.
<b>DOWN button</b>	Move the selected event below the next event on the list.
<b>Menu button</b>	Displays the menu.
<b>Clip View button</b>	Switches the screen to the Clip Player mode.
<b>Add button</b>	Adds the clips (and playlists) that were chosen from the Content List as events after the selected event on the Event List at the right.
<b>Close button</b>	Closes the Edit Playlist screen and goes back to the Playlist Player screen.

# Playlist Player — Event Effect screen

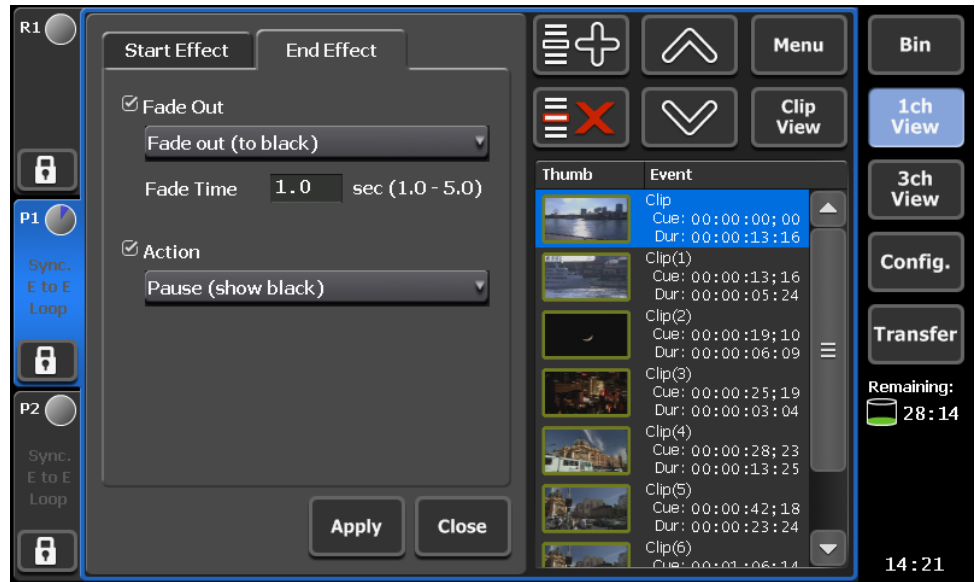

Touching the **Menu** button on the Playlist Player screen and choosing **Event Effect** will open the Event Effect screen.

## Start Effect tab

<b>Fade In</b>	Check this option to add the fade in effect to the chosen event, and choose the effect. <ul style="list-style-type: none"> <li>• Fade in (from black) .....Adds the fade in starting from a black screen.</li> <li>• Fade in (from white) .....Adds the fade in starting from a white screen.</li> </ul>
<b>Fade Time</b>	Specify the duration between the beginning and the end of the fade in.

## End Effect tab

<b>Fade Out</b>	<p>Check this option to add the fade out effect to the chosen event, and choose the effect.</p> <ul style="list-style-type: none"> <li>• Fade out (to black)..... Adds the fade out ending with a black screen.</li> <li>• Fade out (to white)..... Adds the fade out ending with a white screen.</li> </ul>
<b>Fade Time</b>	<p>Specify the duration between the beginning and the end of the fade out.</p>
<b>Action</b>	<p>Choose the action after the fade out ends.</p> <ul style="list-style-type: none"> <li>• Pause (show black)..... Pauses the playback and displays a black screen.</li> <li>• Pause (show white)..... Pauses the playback and displays a white screen.</li> <li>• Pause (last frame) ..... Pauses the playback and displays the last frame.</li> <li>• Pause (next event) ..... Pauses the playback and displays the first frame of the next event.</li> <li>• Pause (show EtoE)..... Displays the video input to the R1 channel with active through.</li> <li>• Loop..... Playbacks the selected event in a loop.</li> </ul>

# Bin

Touching the **Bin** button on the Clip Player screen or the Playlist Player screen for the P1/P2 channel will open the Bin. The Bin has two view modes that can be chosen from the Menu: **Text View** and **Icon View**.

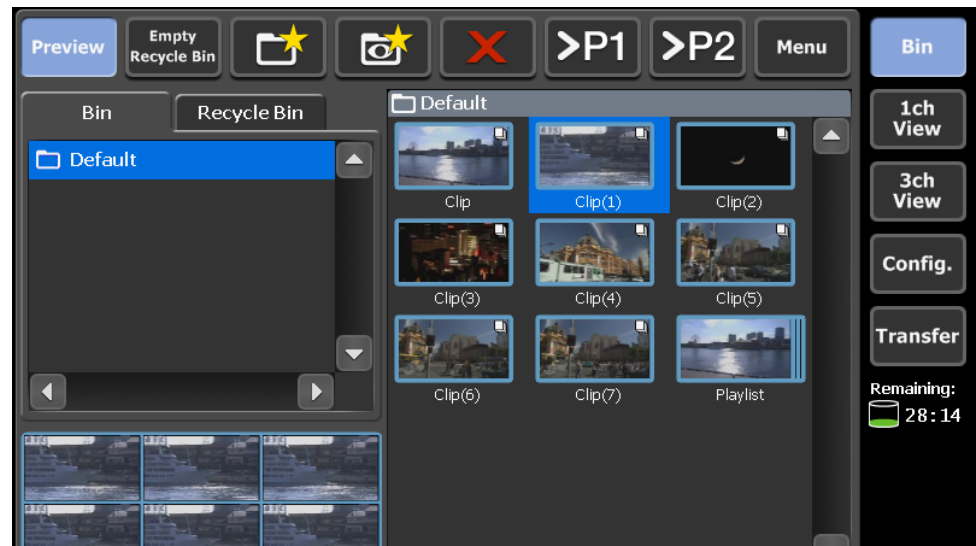

Text View

<b>Preview button</b>	Shows/Hides the preview (film strip).
<b>Empty Recycle Bin button</b>	Deletes all the contents in the Recycle Bin. Note that the deleted contents cannot be restored.
<b>New Folder button</b>	Creates a new Bin folder.
<b>Watch Folder button</b>	Enables/Disables the Watch folder.
<b>Delete button</b>	Deletes the selected contents from the Bin and moves them to the Recycle Bin.
<b>&gt; P1 button</b>	Loads the selected contents to the P1 channel.
<b>&gt; P2 button</b>	Loads the selected contents to the P2 channel.

<b>Menu</b>	<p>Displays the menu.</p> <p><b>View</b> Switches the Bin view between <b>Text View</b> and <b>Icon View</b>.</p> <p><b>Delete Folder</b> Deletes the selected Bin folder and its contents and moves them to the Recycle Bin.</p> <p><b>Rename Folder</b> Renames the selected Bin folder.</p> <p><b>Properties</b> Opens the properties dialog for the item selected on the Content List.</p> <p><b>Tools</b></p> <ul style="list-style-type: none"> <li>• Maintenance.....Choose this option to switch the T2 to the Maintenance mode. Entering a password is required.</li> <li>• Exit.....Choose this option to restart or shutdown the T2.</li> </ul>
<b>Film strip</b>	Displays the preview of the contents with a six-parted film strip.
<b>Bin folder</b>	Displays the Bin folder.
<b>Switching Bin tab</b>	Switches the Bin view between <b>Bin</b> and <b>Recycle Bin</b> .
<b>Content List</b>	Lists the contents in the folder chosen in the Bin folder.

### Icon View

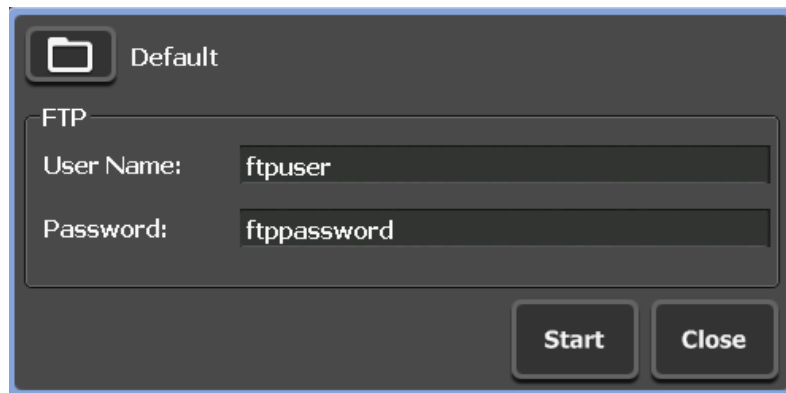

## Thumbnail icons

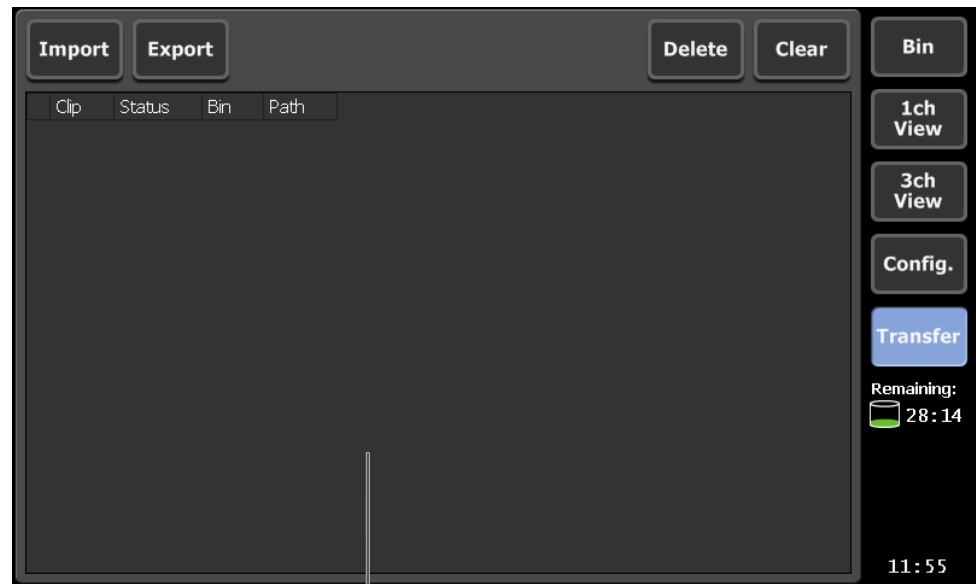

<b>Pairing icon</b>	Displayed on the clips/playlists that have been paired for the Sync mode.
<b>Lock icon</b>	Displayed on the clip/playlist that have been locked.
<b>Used in Playlist icon</b>	Displayed on the clip/playlist that have been used in a playlist.

## Creating Watch Folder screen

<b>Folder name</b>	Displays the Bin folder name to be used as a Watch folder.
<b>FTP</b>	Specify the FTP user name and its password. <b>User Name</b> Input a user name. <b>Password</b> Input the password.

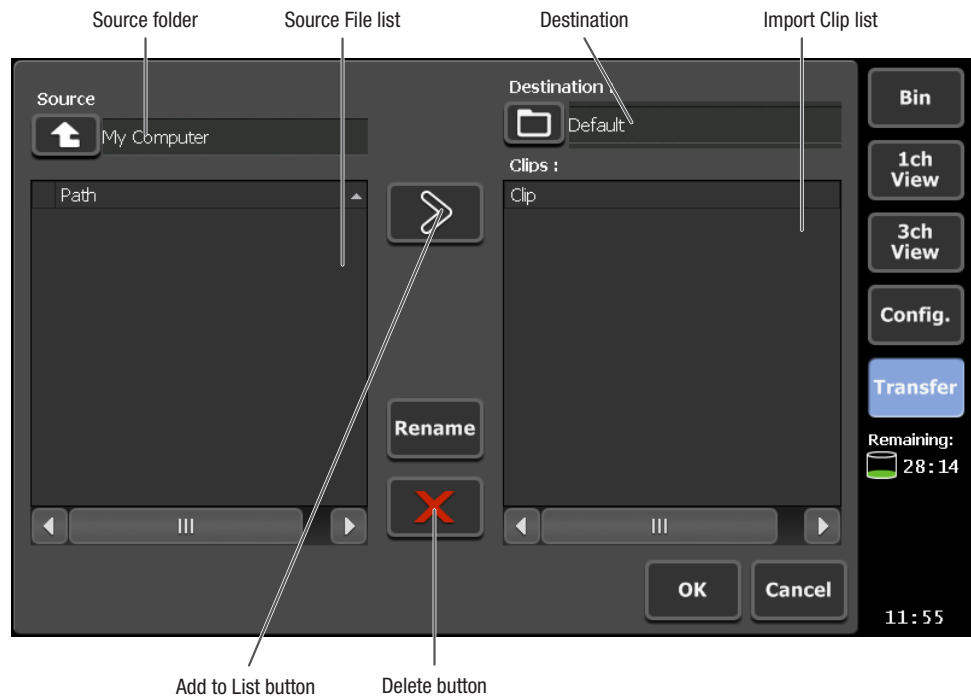

## Transfer screen

Job list

<b>Import button</b>	Displays the Import screen.
<b>Export button</b>	Displays the Export screen.
<b>Delete button</b>	Deletes the selected job. Touching the button while transferring will stop the transfer.
<b>Clear button</b>	Deletes all jobs on the job list.
<b>Job list</b>	Lists the registered jobs. <b>Clip</b> Displays the name of the target clip. <b>Status</b> Displays the progress. <b>Bin</b> Displays the target Bin. <b>Path</b> Displays the name (full path) of the target media file.

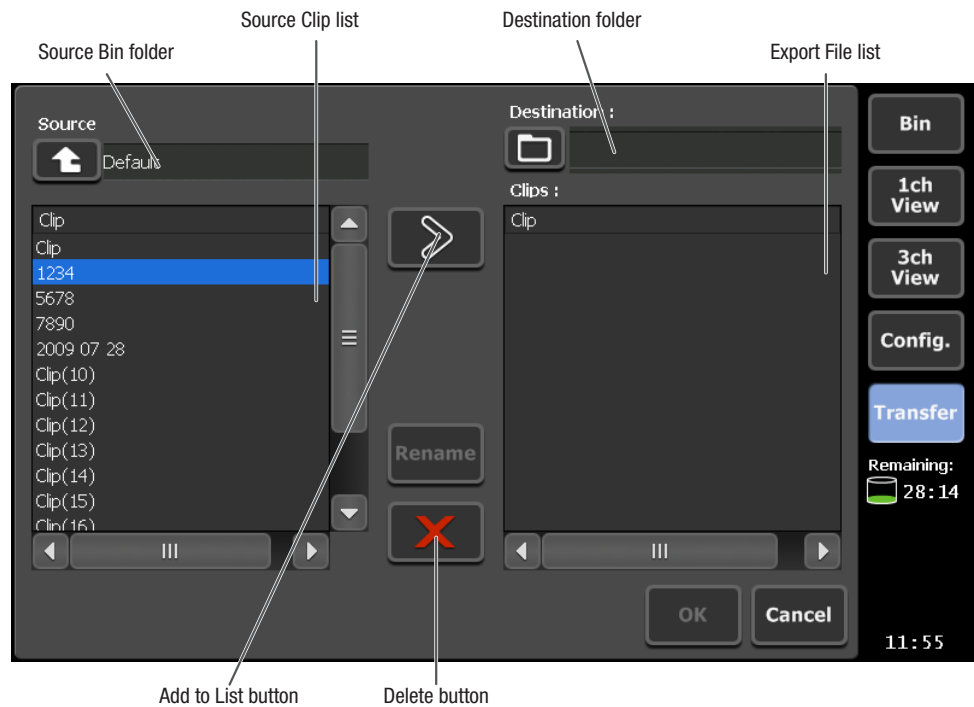

## Import screen

<b>Source folder</b>	Displays the source folder that the contents are imported from. Touching the button on the left opens the parent folder.
<b>Source File list</b>	Lists the media files (and folders) stored in the source folder.
<b>Destination</b>	Displays the destination Bin folder that the contents are imported to. Touching the button on the left opens the folder selection dialog to change the destination folder.
<b>Import Clip list</b>	Lists the clips that will be imported.
<b>Add to List button</b>	Adds the media files selected in the Source File list to the Import Clip list. When the clips are redundant in the destination folder, the clip name will automatically be changed.
<b>Rename button</b>	Renames the selected clip chosen in the Import Clip list. (Only the clip to be imported can be renamed.)
<b>Delete button</b>	Deletes the selected clips chosen in the Import Clip list. (Only the clips to be imported will be deleted.)
<b>OK button</b>	Starts importing according to the Import Clip list registered (ie: Adds jobs to the Transfer screen), and closes the Import screen.
<b>Cancel button</b>	Closes the Import screen.

## Export screen

<b>Source Bin folder</b>	Displays the Bin folder that the contents are exported from. Touching the button on the left opens the Bin selection dialog to change the Bin folder.
<b>Source Clip list</b>	Lists the clips stored in the source Bin folder.
<b>Destination folder</b>	Displays the destination folder that the contents are exported to. Touching the button on the left opens the parent folder.
<b>Export File list</b>	Lists the clips (file name) to be exported. When the file is redundant in the destination folder, the file name will automatically be changed.
<b>Add to List button</b>	Adds the clips chosen in the Source Clip list to the Export File list.
<b>Rename button</b>	Renames the clips chosen in the Export File list from the list. (Only the clips to be exported can be renamed.)
<b>Delete button</b>	Deletes the clips chosen in the Export File list from the list. (Only the clips to be exported will be deleted.)
<b>OK button</b>	Starts exporting according to the Export File list registered (ie: Adds jobs to the Transfer screen), and closes the Export screen.
<b>Cancel button</b>	Closes the Export screen.

## S/W Keyboard screen

When you touch any area where data input is available, this screen appears.

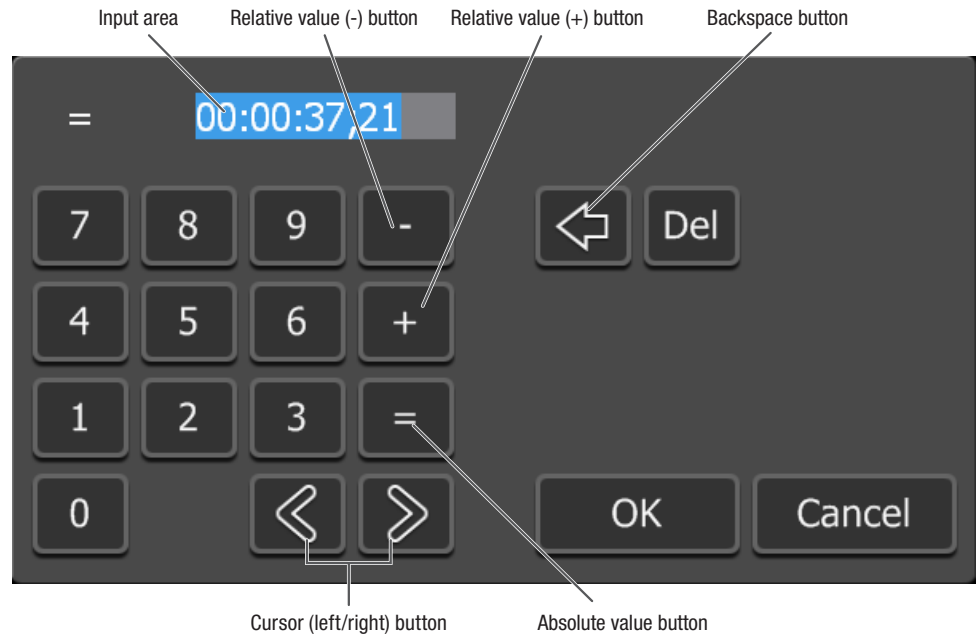

<b>Input area</b>	The string entered with the software keyboard is displayed here. Touching the <b>OK</b> button inputs the string.
<b>Shift button</b>	Used as the Shift key. Toggles Uppercase/Lowercase. Default: Shift Off (lowercase)
<b>Cursor (left/right) button</b>	Moves the cursor in the input area.
<b>Space button</b>	Used as the Space key.
<b>Backspace button</b>	Used as the Backspace key.
<b>Del button</b>	Used as the Delete key.
<b>OK button</b>	Confirms the entered string, and closes the S/W Keyboard screen.
<b>Cancel button</b>	Cancels the entered string, and closes the S/W Keyboard screen.

## S/W Keypad screen

### Timecode input screen

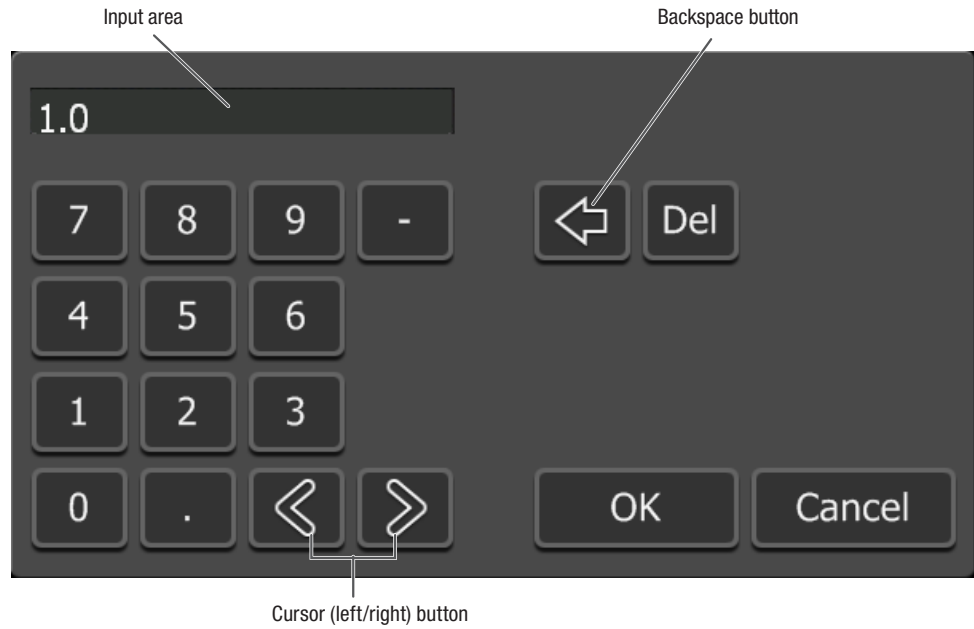

When you touch any area where inputting a timecode is available, this screen appears.

<b>Input area</b>	The value entered with the S/W Keypad is displayed here. According to the digits of the value entered, the value will be converted to Hours, Minutes, Seconds, frames. When the <b>OK</b> button is touched, the value entered here will be set according to the relative value (- / +) or absolute value settings.
<b>Cursor (left/right) button</b>	Moves the cursor in the input area.
<b>Relative value (-) button</b>	Touch this button to use the value as a relative timecode (negative direction) from the current value.
<b>Relative value (+) button</b>	Touch this button to use the value as a relative timecode (positive direction) from the current value.
<b>Absolute value button</b>	Touch this button to use the value as an absolute timecode.
<b>Backspace button</b>	Used as the Backspace key.
<b>Del button</b>	Used as the Delete key.
<b>OK button</b>	Confirms the entered value, and closes the S/W Keypad screen.
<b>Cancel button</b>	Cancels the entered string, and closes the S/W Keypad screen.

## Value input screen

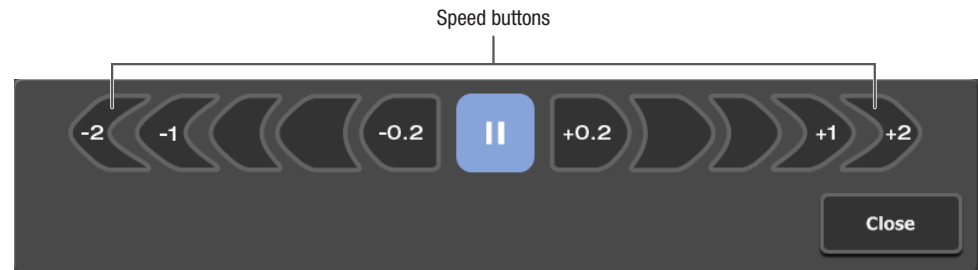

When you touch any area where inputting a value is available, this screen appears.

<b>Input area</b>	The value entered with the S/W Keypad is displayed here. Touching the <b>OK</b> button inputs the value.
<b>Cursor (left/right) button</b>	Moves the cursor in the input area.
<b>Backspace button</b>	Used as the Backspace key.
<b>Del button</b>	Used as the Delete key.
<b>OK button</b>	Confirms the entered value, and closes the S/W Keypad screen.
<b>Cancel button</b>	Cancels the entered string, and closes the S/W Keypad screen.

## VAR Control screen

Pressing the **VAR** button on the front panel opens the window to specify the speed for variable speed playback.

<b>Speed buttons</b>	Specify the speed of the variable speed playback. – direction: $-1/8$ (displayed as $-0.2$ ) > $-1/4$ > $-1/2$ > $-1$ > $-2$ + direction: $1/8$ (displayed as $+0.2$ ) > $1/4$ > $1/2$ > $1$ > $2$
<b>Close button</b>	Closes the VAR Control screen.

## Button functions on the front panel

In the Front Panel mode, the following operations can be executed with the control buttons on the front panel.

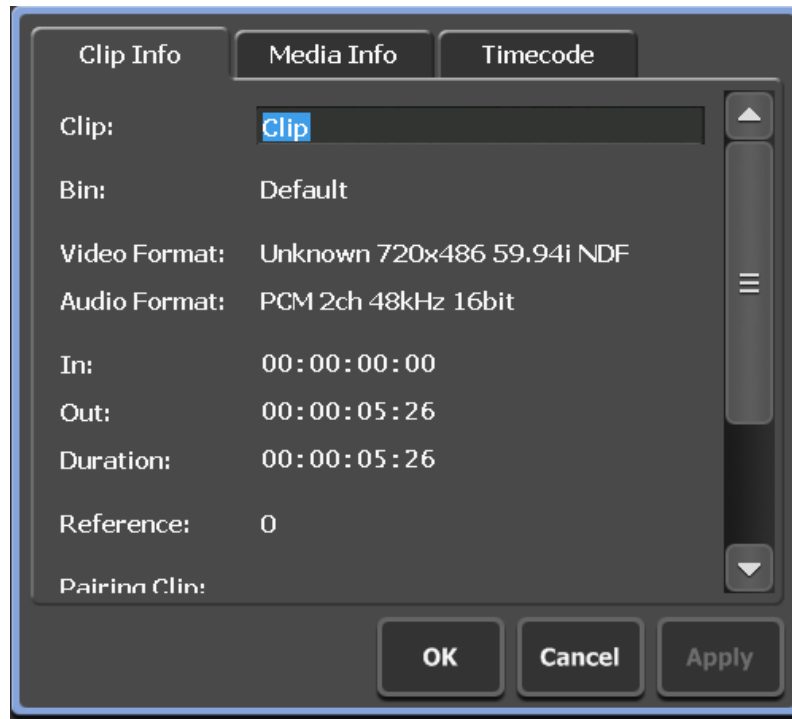

Button	R1 channel	P1/P2 channel (Clip Player)	P1/P2 channel (Playlist Player)
Play button		Starts playback.	Starts playback.
Stop button	Stops recording.	Stops playback.	Stops playback.
Rew button		Moves back frame by frame. Pressing the button will rewind (x32).	Moves back frame by frame. Pressing the button will rewind (x32).
FF button		Moves forward frame by frame. Pressing the button will fast-forward (x32).	Moves forward frame by frame. Pressing the button will fast-forward (x32).
Rec button	Starts recording.		
Stop+Rew		Cues up to the IN point. *	Moves to the previous event's (IN point).
Stop+FF		Cues up to the OUT point. *	Moves to the next event's (IN point).
Play+Rew		Cues up to the IN point and starts playing.	Starts playing the previous event.
Play+FF		Cues up to the OUT point.	Starts playing the next event.

\* Jumps to the top of the clip, the IN point of the clip, the OUT point of the clip, or the end of the clip according to the current position.

# Properties screen

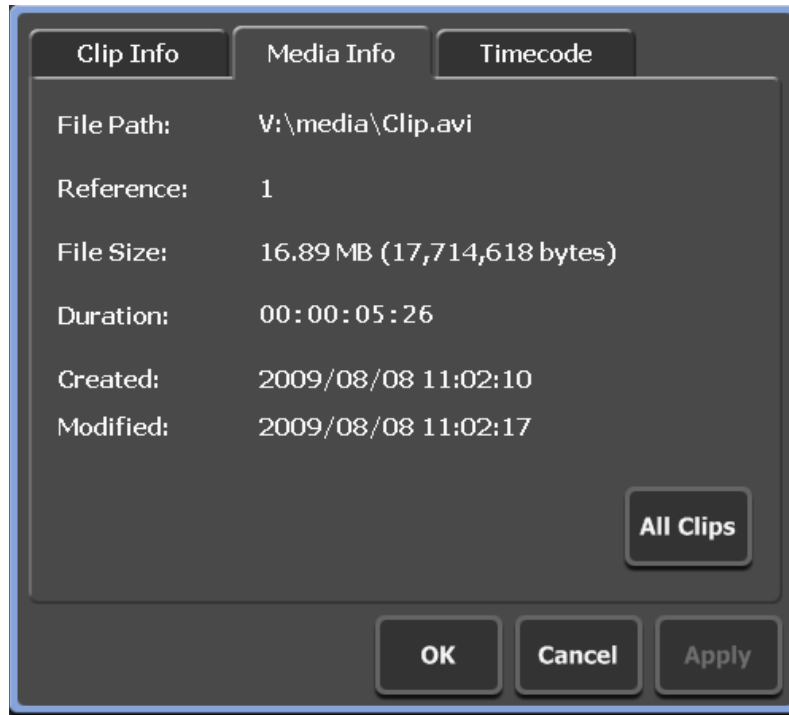

## Clip properties

### Clip Info tab

<b>Clip</b>	Displays the clip name. The clip name can be changed in this screen.
<b>Bin</b>	Displays the name of the Bin folder where the clip is registered.
<b>Video Format</b>	Displays the video format.
<b>Audio Format</b>	Displays the audio format.
<b>In</b>	Displays the timecode at the IN point.
<b>Out</b>	Displays the timecode at the OUT point.
<b>Duration</b>	Displays the duration of the clip.
<b>Reference</b>	Displays the number of playlists that refer to the clip.
<b>Pairing Clip</b>	Displays the clip name that is paired with this clip for the Sync mode.
<b>Created</b>	Displays the timestamp when the clip was created.
<b>Modified</b>	Displays the timestamp when the clip was updated.
<b>Lock</b>	Check this option to lock the clip.

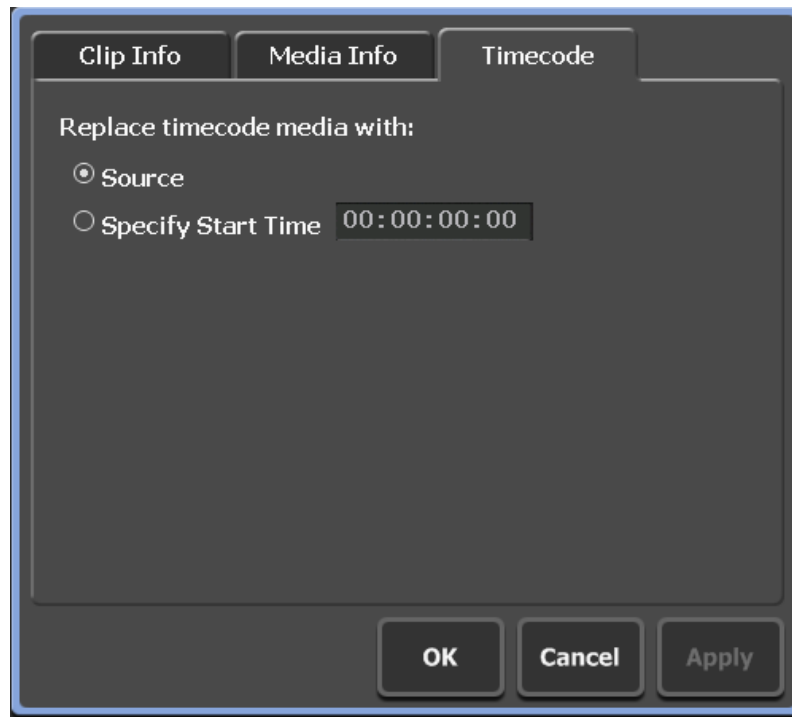

## Media Info tab

<b>File Path</b>	Displays the file name and the file path for the media file.
<b>Reference</b>	Displays the number of clips and playlists that refer to the media file.
<b>File Size</b>	Displays the size of the media file.
<b>Duration</b>	Displays the duration of the media file.
<b>Created</b>	Displays the timestamp when the clip media file was created.
<b>Modified</b>	Displays the timestamp when the clip media file was updated.
<b>All Clips button</b>	Displays the clips that refer to the media file.

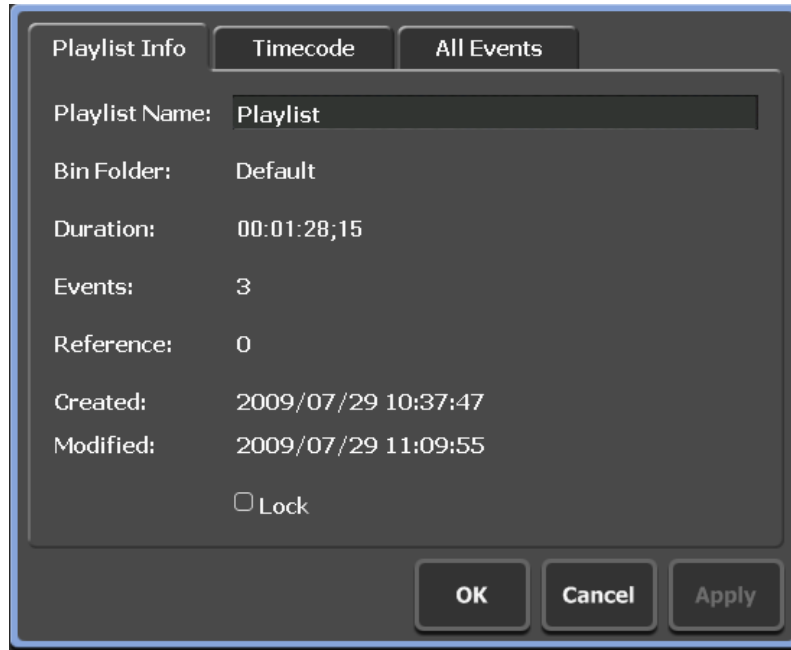

## Timecode tab

<p><b>Replace timecode media with</b></p>	<p>Specifies the method to change the timecode.</p> <p><b>Source</b> Check this option to replace with the timecode for the source.</p> <p><b>Specify Start Time</b> Check this option to specify the starting timecode, and specify the value.</p>
---	---

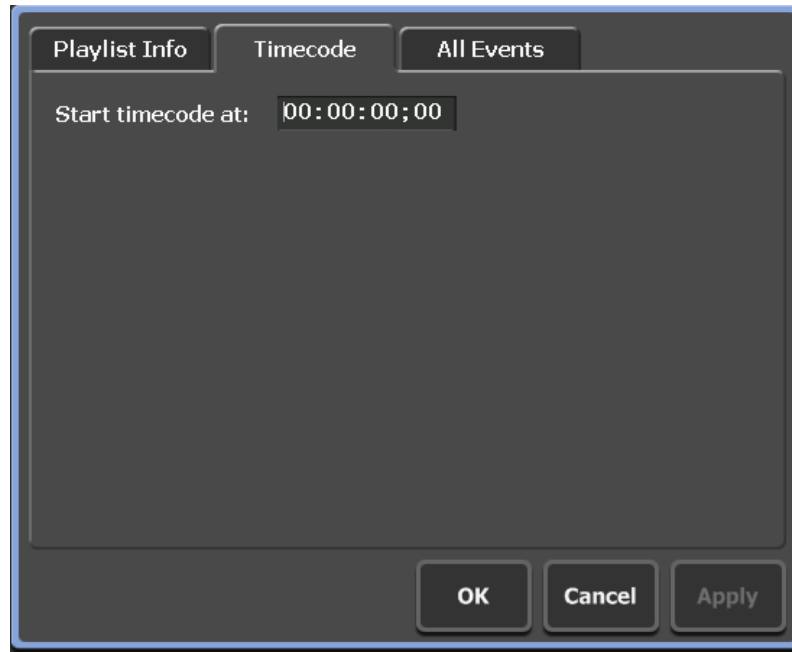

## Playlist properties

### Playlist Info tab

<b>Playlist Name</b>	Displays the playlist name. The playlist name can be changed on this screen.
<b>Bin Folder</b>	Displays the name of the Bin folder where the playlist is registered.
<b>Duration</b>	Displays the duration of the playlist.
<b>Events</b>	Displays the number of events registered on the playlist.
<b>Reference</b>	Displays the number of playlists that refer to the playlist.
<b>Created</b>	Displays the timestamp when the playlist was created.
<b>Modified</b>	Displays the timestamp when the playlist was updated.
<b>Lock</b>	Check this option to lock the playlist.

## Timecode tab

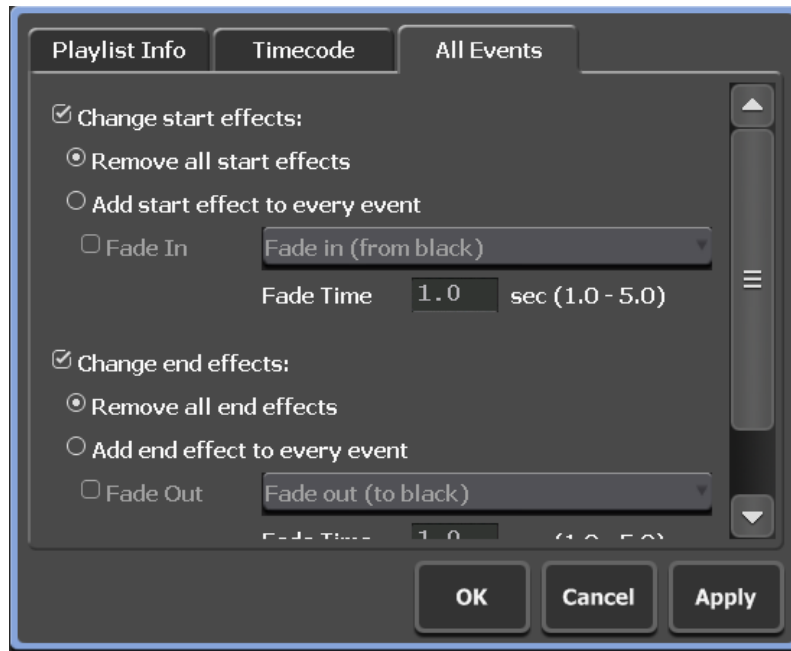

---

<b>Start timecode at</b>	Check this option to specify the starting timecode, and specify the value.
--------------------------	--

---

## All Events tab

In this tab, the settings for all the events registered on the playlist can be modified globally.

### Change start effects

Check this option to change the start effect of the events.

#### Remove all start effects

Removes the start effects from all the events.

#### Add start effect to every event

Adds start effects to all the events.

#### Fade In

Adds fade in to all the events.

- Fade in (from black) .....Adds the fade in starting from a black screen.
- Fade in (from white) .....Adds the fade in starting from a white screen.

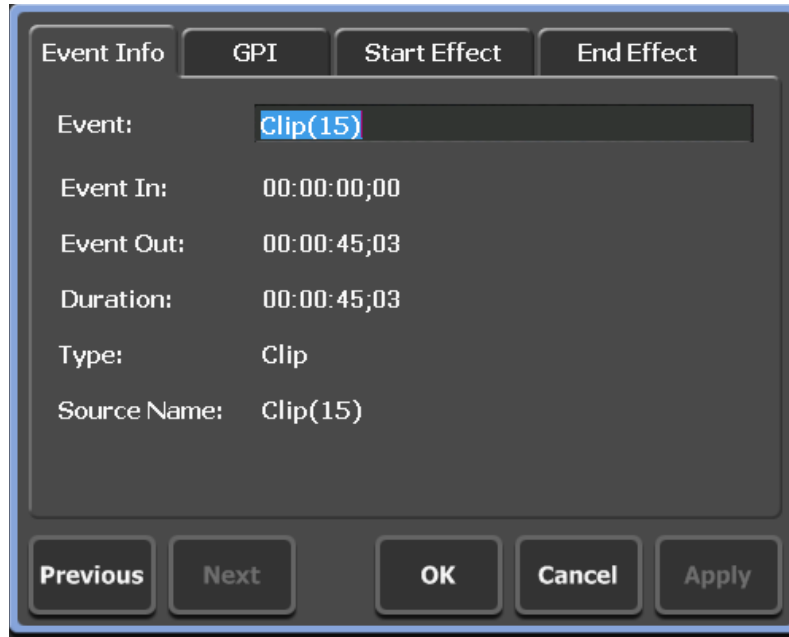

#### Fade Time

Specify the duration between the beginning and the end of the fade in.

<p><b>Change end effects</b></p>	<p>Check this option to change the end effect of the events.</p> <p><b>Remove all end effects</b> Removes the end effects from all the events.</p> <p><b>Add end effect to every event</b> Adds end effects to all the events.</p> <p><b>Fade Out</b> Adds fade out to all the events.</p> <ul style="list-style-type: none"> <li>• Fade out (to black) .....Adds the fade out ending with a black screen.</li> <li>• Fade out (to white) .....Adds the fade out ending with a white screen.</li> </ul> <p><b>Fade Time</b> Specify the duration between the beginning and the end of the fade out.</p> <p><b>Action</b> Check this option to specify the action when the playback ends.</p> <ul style="list-style-type: none"> <li>• Pause (show black) .....Pauses the playback with a black screen displayed.</li> <li>• Pause (show white) .....Pauses the playback with a white screen displayed.</li> <li>• Pause (last frame) .....Pauses the playback with the last frame displayed.</li> <li>• Pause (next event) .....Pauses the playback with the first frame of the next event displayed.</li> <li>• Pause (show E to E) .....Displays the video input to the R1 channel with active through.</li> <li>• Loop .....Playbacks the selected event in loop.</li> </ul>
----------------------------------	---

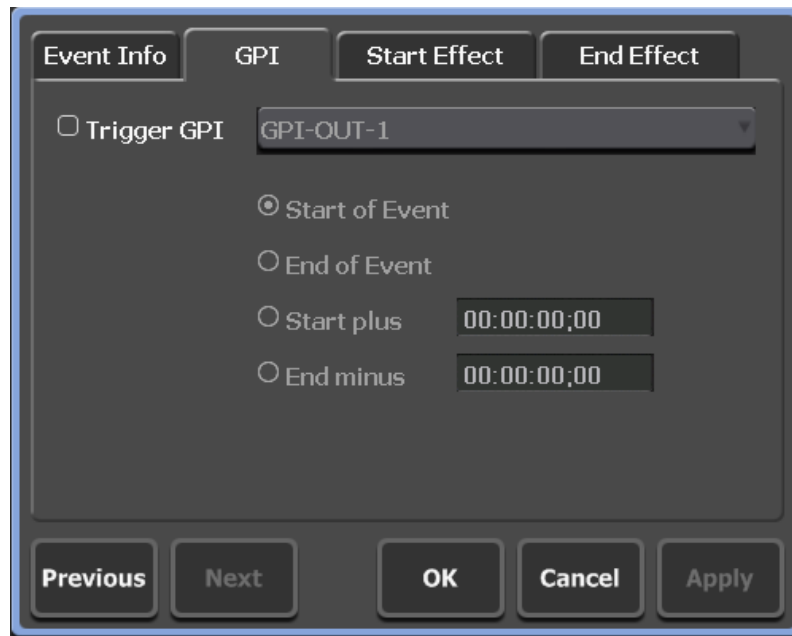

## Event properties

### Event Info tab

<b>Event</b>	Displays the event name. The event name can be changed on this screen.
<b>Event In</b>	Displays the timecode at the IN point.
<b>Event Out</b>	Displays the timecode at the OUT point.
<b>Duration</b>	Displays the duration of the event.
<b>Type</b>	Displays the type of event (Clip or Playlist).
<b>Source Name</b>	Displays the clip name or the playlist name that the event refers to.

## GPI tab

<b>Trigger GPI</b>	Choose the GPI trigger to specify setting.
<b>Start of Event</b>	Check this option to set the start of an event as a trigger.
<b>End of Event</b>	Check this option to set the end of an event as a trigger.
<b>Start plus</b>	Check this option to set a certain point from the top of an event as a trigger, and then specify the value.
<b>End minus</b>	Check this option to set a certain point before the end of an event as a trigger, and then specify the value.

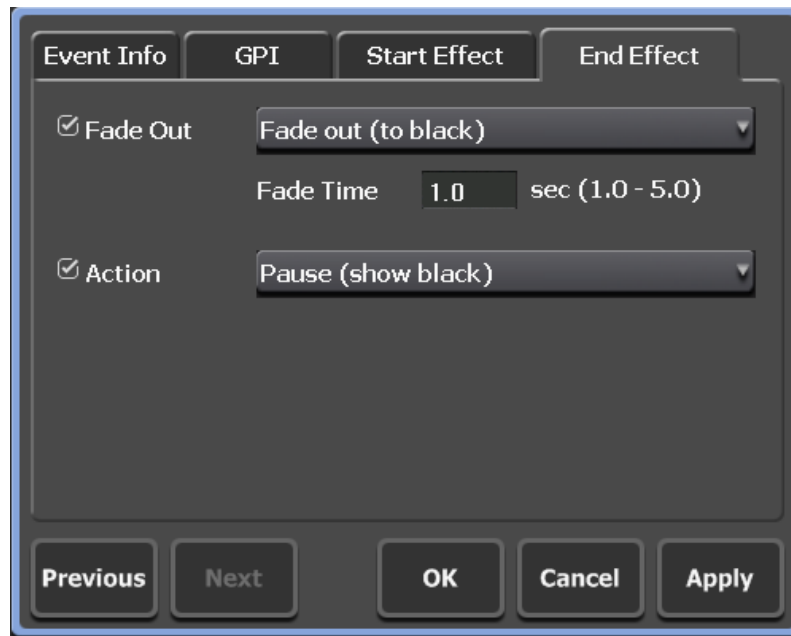

### Start Effect tab

<b>Fade In</b>	<p>Check this option to add the fade in effect to the chosen event, and choose the effect.</p> <ul style="list-style-type: none"> <li>• Fade in (from black) .....Adds the fade in starting from a black screen.</li> <li>• Fade in (from white) .....Adds the fade in starting from a white screen.</li> </ul>
<b>Fade Time</b>	Specify the duration between the beginning and the end of the fade in.

## End Effect tab

<p><b>Fade Out</b></p>	<p>Check this option to add the fade out effect to the chosen event, and choose the effect.</p> <ul style="list-style-type: none"> <li>• Fade out (to black)..... Adds the fade out ending with a black screen.</li> <li>• Fade out (to white)..... Adds the fade out ending with a white screen.</li> </ul>
<p><b>Fade Time</b></p>	<p>Specify the duration between the beginning and the end of the fade out.</p>
<p><b>Action</b></p>	<p>Specify the action when the event comes to an end.</p> <ul style="list-style-type: none"> <li>• Pause (show black)..... Pauses the playback with a black screen displayed.</li> <li>• Pause (show white)..... Pauses the playback with a white screen displayed.</li> <li>• Pause (last frame) ..... Pauses the playback with the last frame displayed.</li> <li>• Pause (next event) ..... Pauses the playback with the first frame of the next event displayed.</li> <li>• Pause (show E to E) ..... Displays the video input to the R1 channel with active through.</li> <li>• Loop ..... Playbacks the selected event in loop.</li> </ul>

# *APPENDIX*

## T2 Hardware specifications

PC interface USB	USB		USB2.0 x2 (front), x6 (rear)
	IEEE1394		IEEE1394a x1 (front), x1 (rear), Up to 12V , 1A of bus power (total for both ports)
	PS/2		Mini DIN 6pin x2
	Display		Analog RGB D-SUB 15pin x1
	Serial		RS232C D-SUB 9pin x1 (Not used)
	LAN		RJ-45 Network connector x2, 10BASE-T/100BASE-TX/1000BASE-T
	Sound		Stereo mini jack x6 (Not used)
Removable media			DVD-ROM x1
			2.5 inched removable drive bay x1 (RAID/SSD model)
Video signal	Input	SDI	1 line, BNC x2 (Active through x1)
		DVI-I	1 line, DVI-I x1. The analog sections are also for YPbPr. (DVI-D does not support HDCP.)
		Composite	1 line, BNC x1
	Output	SDI	2 lines, BNC x2
		DVI-I	2 lines. The analog sections are also for RGB/YPbPr.
		Composite	2 lines, BNC x2
		Monitor	Composite, 2 lines, BNC x2
Audio signal	Input	Balanced audio	1 line, XLR-3-31 x2, Up to 24dBu
		Digital audio	1 line, AES/EBU BNC x1
	Output	Balanced audio	2 lines, XLR-3-32 x4
		Digital audio	1 line, AES/EBU, 2 lines, BNC x2
		Headphones	Stereo jack x1
Monitor line	Stereo mini jack x1		
Timecode	Input	LTC	1 line, BNC x1
	Output	LTC	2 lines, BNC x2
REF in			HD tri-level, BB compatible, BNC x2 (throughout x1)
Remote	GPI I/O		D-SUB 15pin x1, 6 input, 6 output pins.
	RS422		3 lines, D-SUB 9pin x3 (each one of the lines correspond to the R1, P1 or P2 channel)
Power supply			AC 100V - 240V, 50/60Hz
Power consumption			2.5A - 1.1A
Dimensions			430(W) x 132(H) x 550.8(D) (Projecting parts not included)
Weight			15kgf approximately
Operating temperature			+5 to +35 degrees C
Operating humidity			10% to 80% (Without condensation)

## Supported resolutions

Profile	Available format for loading	Available video port	Conversion mode for PC		Output to monitor	R1 input, REF input signal for Sync mode
			DVI-D	DVI-A (RGB)		
720×486 59.94i	720×486 59.94i 720×480 59.94i (DVD) 720×480 59.94i (DV)	SDI Component Composite	×	×	NTSC	720×480 59.94i
720×576 50i	720×576 50i (DV) 720×576 50i (DVD)	SDI Component Composite	×	×	PAL	720×576 50i
1920×1080 59.94i	1920×1080 59.94i 1440×1080 59.94i 1280×1080 59.94i	SDI Component DVI-D *1	PC	PC	NTSC	720×480 59.94i, 1920×1080 59.94i
1920×1080 50i	1920×1080 50i 1440×1080 50i	SDI Component DVI-D *2	PC	PC	PAL	720×576 50i, 1920×1080 50i

1920×1080 23.98psf	1920×1080 23.98p 1440×1080 23.98p 1280×1080 23.98p	SDI Component DVI-D (23.98p)	PC	PC	×	1920×1080 23.98psf (REF in only)
1920×1080 24p	1920×1080 24p 1440×1080 24p	SDI Component DVI-D	PC	PC	×	1920×1080 24p (REF in only)
1920×1080 23.98p	1920×1080 23.98p 1440×1080 23.98p 1280×1080 23.98p	SDI Component DVI-D	PC	PC	×	1920×1080 23.98p (REF in only)
1280×720 59.94p	1280×720 59.94p 960×720 59.94p	SDI Component DVI-D	PC	PC	NTSC	720×480 59.94i *3
1280×720 50p	1280×720 50p 960×720 50p	SDI Component DVI-D	PC	PC	PAL	720×576 50i *3
1280×720 24p	960×720 24p	SDI Component	×	×	×	1280×720 24p (REF in only)
1280×720 23.98p	1280×720 23.98p 960×720 23.98p	SDI Component	×	×	×	1280×720 23.98p (REF in only)

\*1 Can be specified to 1920 x 1080p 59.94.

\*2 Can be specified to 1920 x 1080p 50.

\*3 As the playback of channels is synchronized with paired frames, the sync mode is not available in 3Sync phase

PC Can be specified to VGA, SVGA, XGA, or SXGA.

Note 1 Component and DVI-A (RGB) cannot be used simultaneously.

Note 2 DVI-I and DVI-A outputs in PC conversion mode cannot be used for Sync mode.

Note 3 When the aspect ratios of the source and the profile differ, a black bar is added to the top/bottom or left/right sides.

Note 4 The DVI/RGB signal is output with a certain delay from the SDI/YPbPr output.

## GPI I/O connector pinouts

Pin	Signal
1	Output 1
2	Output 2
3	Output 3
4	Output 4
5	Output 5
6	Output 6
7	NC
8	Common Ground

Pin	Signal
9	Input 1
10	Input 2
11	Input 3
12	Input 4
13	Input 5
14	Input 6
15	NC
SHELL	Common Ground

**Note** T2 iDDR software supports outputs 1-6 and inputs 1-6 only. Pin 7 and Pin 15 are not used.
