2 About this document

This document applies to TX/Dashboard release 1.1.

3 Credentials

The default credentials TX/MAM are:

Via the web interface: User: sysdba Password: masterkey

4 Starting TX/Dashboard

To start TX/Dashboard, in a web browser enter the TX/MAM servers' virtual IP-address/txdashboard.
Example: <http://10.250.51.16/txdashboard/>

Note that you need to different have access rights to the TX/Dashboard options. These rights are set in TX/MAM.

5 About

Click the **About** option to view TX/Dashboard versions and release notes.

6 Channels

The screenshot displays the Grass Valley TX/DASHBOARD interface. At the top left is the logo and 'grass valley | TX/DASHBOARD'. At the top right are links for Profile, Logout, and About, and a status indicator 'Logged as: sysdba'. A left sidebar contains a menu with 'Channels', 'Options', 'Commands', 'Services', and 'Log'. The main content area is divided into three sections:

- CHANNELS:** Lists three channels: Channel 1 (10.250.51.253) with a green status dot, Preview 1 (10.250.51.253) with a green status dot, and Record 1 (10.250.50.83) with a grey status dot.
- SERVICES:** Lists several services with their status and control buttons (start, stop, restart):
 - database (database v2.41) - green status
 - dataserver (dataserver - v3.82) - green status
 - encoderd (encoderd v4.12) - green status
 - firebird (firebird LI-V2.5.1.26351) - green status
 - nexos (nexos-v3.2-beta8 (Oct 9 2012 08:40:54)) - green status
 - playout_distri (playout_distri - v3.86) - green status
 - pt_guard (pt_guard v1.2) - green status
 - schedulesync0 (schedulesync - v1.45) - green status
 - sequencer0 (sequencer - v2.97.5) - green status
- CHANNEL LOG:** A table showing logging for the channel. The table has columns for Date, User, and Message.

Date	User	Message
18.12.2012 16:22:32	sysdba	COMMAND pt_guard start
18.12.2012 16:22:30	sysdba	Connected successfull
18.12.2012 16:21:32	sysdba	COMMAND dataserver start
18.12.2012 16:21:30	sysdba	Connected successfull
18.12.2012 16:17:23	sysdba	COMMAND dataserver stop
18.12.2012 16:17:21	sysdba	Connected successfull
18.12.2012 16:15:30	sysdba	COMMAND dataserver start
18.12.2012 16:15:27	sysdba	Connected successfull
18.12.2012 16:14:56	sysdba	COMMAND dataserver restart
18.12.2012 16:14:54	sysdba	Connected successfull

At the bottom of the Channel Log section, there are navigation links: 'First | < Previous | 1 | Next > | Last' and 'Page 1 of 1'.

Click the Channels menu item to view Channels, the Services running on them, and their status:

- green: OK
- red: error
- grey: not configured

Click the **start/stop/restart** options to start, stop or restart a Service.

The CHANNEL LOG section shows the Channel's logging.

7 Options and Commands

Not covered in this manual.

8 Services

This page lists Channels and Services. You can click a Service to update.

9 Log

Shows logging for all Channels.
