1 APPLICATION

A 3U modular 5V at 20A power supply based on an industry standard switch mode unit. It is supplied configured either for 110 Vac or 220/240 Vac mains.

2 GENERAL DESCRIPTION

This module is a 3U eurocard module based on the Coutant HSU 100- 10 PSU. This supplies +5V at 20A nominal. The front panel has a power indicator LED and an output voltage adjustment. The output voltage is +5.4V.

The unit may be supplied configured for 110 Vac or 220/240 Vac operation. Check the label attached before powering.
