Description When a proDAD Vitascene transition was applied as a track transition, a “No such interface supported (0x80004002)” error occurred.

*To fix this issue, please update Vitascene using **Service Pack 1.1.89**.

NB: this issue still occurs on 24-core based systems.

Known Issues

Rendering status remains red/yellow after rendering New Blue effect

Description If a New Blue effect is applied, the rendering status remains red or yellow, even after rendering the video on timeline.

Workaround For real-time playback, choose [Render and Add to Timeline] menu from the Rendering menu.

Cannot preview video when using Vitascene filter

Description If a Vitascene filter is applied, video preview is affected while scrubbing.

Workaround Render the video before scrubbing.
