

Release Notes for Ignite v11.0.2

Bug Fixes

[IGN-7749] Changes made in the Ignite Playlist plugin may not be applied

- Changes made in the Ignite Playlist plugin are now applied.

[IGN-7752] Setting the Device of a CG Item to "No Device" in an Option may not be saved in Event Builder

- Event Builder now saves the Device in the Option properly when "No Device" is selected. This works when either "Save" or "Save & Close" are used.

[IGN-7755] Countdown timer duration cannot be changed in Event Builder

- When the countdown timer duration is changed in Event Builder, it is now saved properly.

[IGN-7810] A Vinten camera .caps file containing a preset name that exceeds 19 characters will cause the Vinten camera module to terminate unexpectedly

- If the Vinten camera module encounters a preset name exceeding 19 characters in a Vinten .caps file, the preset name is truncated to 19 characters. The Vinten camera module will not terminate in such a case.

New Features

None.
