

Release Notes for Ignite v11.1.6

Bug

- **[IGN-10422]** Changes made in PT (Persistent Template) may accidentally wipe out loaded clips for Video Servers in the same event

Ignite users now can make changes in Persistent Template without affecting the loaded clips for Video Servers in the same event.

- **[IGN-10351]** Changes made in PT (Persistent Template) may cause CG devices in the same event to lose their functionality

Ignite users now can make changes in PT, without affecting the functionality of CG devices in the same event.

- **[IGN-9718]** Saving Shared Options may indicate an error in Event Builder even when the option is saved successfully

When saving a Shared Option, Event Builder now displays the progress of the save as a percentage and correctly indicates that the option has been saved successfully.

Enhancement

- **[IGN-10424]** IgniteX re-connection improvement

Ignite X running on a remote PC now re-connects to the Ignite server in a more reliable fashion after the connection is lost.
