Introducing iMC v8.0.9

The iMC-Panel-100, iMC-Panel-200 and iMC-Panel-300 Imagestore master control panels are intended for use with the Imagestore-750 and Imagestore Modular (ISM) products within a master control environment. Version 8.0 of the iMC panel software introduces support for the -02 variants of the iMC-Panel-200 and iMC-Panel-300 panels. The -02 variants are functionally identical to the -01 variants, but contain newer components which are not backwards compatible with previous software.

Note: As of version 8.0 onwards, the NV5100MC is not supported by the iMC-Panel-100, iMC-Panel-200 or iMC-Panel-300 panels.

IMPORTANT: Due to MCE/MCPM panels now being end of life, they will no longer be supported as of iMC v8.0.0 onwards; therefore, the panels can only be used with the Imagestore range or products. Support has also ceased for some legacy panel types so that only iMC100, iMC200, iMC300 and iMC-GUI are supported. Users of MCE/MCPM and older panel types should remain on a version less than version 8.0.0.

New Features

IMCPANELS-22: Added support for Rev FR0118-02/FR0119-02 iMC panels

Support has been added for Rev FR0118-02/FR0119-02 panels, which contain a new touchscreen controller.

Improvements

IMCPANELS-20: Rebranded panel and updated copyright notices

The panel software and Windows applications have been updated to reflect the updated company name and logos of Grass Valley, A Belden Brand.

Fixes

IMCPANELS-24: Upgrading software is incorrectly warning of downgrade

Previous software releases may have displayed a warning message about downgrading the panel software, even when the new software version was a later version than the installed version. This has been corrected so the warning message is only displayed for genuine downgrades.

Support

Panel Software Support

Panel Revision	Frame Revision	Required software
iMC-100	All	Minimum v7.0.0
iMC-200	FR0118-01	Minimum v7.0.0
iMC-200	FR0118-02	Minimum v8.0.0
iMC-300	FR0119-01	Minimum v7.0.0
iMC-300	FR0119-02	Minimum v8.0.0
