Grass Valley Web Site

The www.grassvalley.com web site offers the following:

Online User Documentation — Current versions of product catalogs, brochures, data sheets, ordering guides, planning guides, manuals, and release notes in .pdf format can be downloaded.

FAQ Database — Solutions to problems and troubleshooting efforts can be found by searching our Frequently Asked Questions (FAQ) database.

Software Downloads — Download software updates, drivers, and patches.

END-OF-LIFE PRODUCT RECYCLING NOTICE

Grass Valley's innovation and excellence in product design also extends to the programs we've established to manage the recycling of our products. Grass Valley has developed a comprehensive end-of-life product take back program for recycle or disposal of end-of-life products. Our program meets the requirements of the European Union's WEEE Directive, the United States Environmental Protection Agency, and U.S. state and local agencies.

Grass Valley's end-of-life product take back program assures proper disposal by use of Best Available Technology. This program accepts any Grass Valley branded equipment. Upon request, a Certificate of Recycling or a Certificate of Destruction, depending on the ultimate disposition of the product, can be sent to the requester.

Grass Valley will be responsible for all costs associated with recycling and disposal, including freight. However, you are responsible for the removal of the equipment from your facility and packing the equipment to make it ready for pickup.

For further information on the Grass Valley product take back system please contact Grass Valley at + 800 80 80 20 20 or +33 1 48 25 20 20 from most other countries. In the U.S. and Canada please call 800-547-8949 or 530-478-4148, and ask to be connected to the EH&S Department. Additional information concerning the program can be found at: www.thomsongrassvalley.com/environment

Jupiter Release Notes Addendum

This document provides information about issues corrected in the current and recent versions of the Jupiter software. In addition, issues known to exist in the current version are documented.

Corrected Issues in the 7.9.0 Version

CR	Correction	Area
113194	Corrected an issue where an S50 or S100 panels button would not show status during a Switch.	S50 / S100 panels

Known Issues/Limitations

As with any software package, some problems and/or limitations remain. Many of these are known and are detailed below.

Please note that the following description of these issues is not an agreement to correct or to modify them.

WARNING The Remote PC feature is no longer supported (since the 7.8.2 version of Jupiter) and may not work as desired due to changes in the Microsoft Windows operating system. Grass Valley has no control over the changes Microsoft implements. Furthermore, Grass Valley assumes no responsibility or liability for any continued use of this feature; the user of this feature assumes all risk and liability including, without limitation, lost profits, business interruption, or lost information.

CR	Problem/Limitation	Area
112263	The Remote PC feature is no longer supported. Grass Valley assumes no responsibility or liability for any continued use of this feature; the user of this feature assumes all risk and liability including, without limitation, lost profits, business interruption, or lost information.	Remote PC
113624	You must have a Static IP address when installing AccuSwitch to avoid configuration problems.	Installation
100552	Changes to the Time Standard table do not take effect until after rebooting the CM.	Configuration
66947	Only physical inputs between 000-999 can be used as Primary and Indirect sources	Configuration
110540	When a Take is made from an IP or GUI panel, occasionally the logger application does not correctly identify the panel that performed the Take.	Logger Application
113226	The log viewer will report the wrong CP number when an invalid switch request is received.	Logger Application
112866	Jupiter will not display the SAFE status for a Triton output that has been disconnected.
