Grass Valley Web Site

The www.grassvalley.com web site offers the following:

Online User Documentation — Current versions of product catalogs, brochures, data sheets, ordering guides, planning guides, manuals, and release notes in .pdf format can be downloaded.

FAQ Database — Solutions to problems and troubleshooting efforts can be found by searching our Frequently Asked Questions (FAQ) database.

Software Downloads — Download software updates, drivers, and patches.

END-OF-LIFE PRODUCT RECYCLING NOTICE

Grass Valley's innovation and excellence in product design also extends to the programs we've established to manage the recycling of our products. Grass Valley has developed a comprehensive end-of-life product take back program for recycle or disposal of end-of-life products. Our program meets the requirements of the European Union's WEEE Directive, the United States Environmental Protection Agency, and U.S. state and local agencies.

Grass Valley's end-of-life product take back program assures proper disposal by use of Best Available Technology. This program accepts any Grass Valley branded equipment. Upon request, a Certificate of Recycling or a Certificate of Destruction, depending on the ultimate disposition of the product, can be sent to the requester.

Grass Valley will be responsible for all costs associated with recycling and disposal, including freight. However, you are responsible for the removal of the equipment from your facility and packing the equipment to make it ready for pickup.

For further information on the Grass Valley product take back system please contact Grass Valley at + 800 80 80 20 20 or +33 1 48 25 20 20 from most other countries. In the U.S. and Canada please call 800-547-8949 or 530-478-4148, and ask to be connected to the EH&S Department. Additional information concerning the program can be found at: www.thomsongrassvalley.com/environment

Version **2.0.1**
SEPTEMBER 2009

Jupiter Control Panel Release Notes

Introduction

This document describes product enhancements provided by the 2.0.1 version of the Jupiter L-S and LCD Control panels. It also describes the installation requirements to upgrade an existing panel to the latest version. See the L-S and LCD Series Control Panels manual (part # 0718536XX) for the actual Installation and Configuration steps.

Note This release supports the English version of Windows XP Professional operating system only.

New Features in Jupiter AccuSwitch L-S, LCD Panels

The 2.0.1 version of the Jupiter AccuSwitch L-S, LCD Panels software has the following new feature: Advise Router Option.

This new feature provides customers with improved control and flexibility to meet their business needs. This new feature is explained below.

Advise Router Option

When the Advise flag option has been set in the Jupiter Control system and an attempt is made to switch control to a new device, the switch will not occur. The system will instead display the following message on the control panel in two lines:

```
SRC in use
```

```
by: <Destination name>
```

The switch to a new device will not be executed until the destination that is using the source is either:

- Switched to a different source.
- Switched to the "SAFE" input.

Note The Advise and Enforce options do not work when you are using Sequences or Multiple-destination switching when the same source is being routed to more than one destination.

This option will avoid having the control device connected to two machines at the same time.

Upgrade Procedure

See the L-S and LCD Series Control Panels manual (part # 0718536XX) for the actual Installation and Configuration steps.

Caveats

Before starting the upgrade procedure the following caveats must be read. During this upgrade procedure:

- Any button data that has been programmed into the panel using the front panel may be lost
- However, all the data from the Panel Network page is retained. That is, Net-1 and 2 IP settings, Host IP's and Device Id are all retained. Information on the Panel System page is retained as well.

Equipment Required

GV-supplied PC 3000 (F7-029500-121) file server or a PC with the following minimum requirements:

To run NetConfig you will need:

- Windows 2000 SP4 and above, or Windows XP SP2 and above operating system,
- Administrator-level privileges for the local machine
- Internet Explorer version 5.5 or later installed.
- 5 MB of free Hard Disc space.

To use the new serial connection feature with the Control panels, you must have Jupiter 7.8.0 or newer installed.

Materials Supplied

The item shown in the table below are supplied with this release.

QTY	Description	Part number
1	Software, CD, NetConfig 2.0.9 and L, S, and LCD Panels 2.0 Code	063829603
1	L-S, LCD Control Panel User Guide	071853603
