UPDATE HISTORY

The following issues are fixed or improved in this version.

Create wave form cache when importing a clip from read-only media

Description: EDIUS now creates a waveform cache when importing clips from read-only media such as CD/DVD-ROM.

Choice to creating wave form cache or not

Description: EDIUS now allows the user to turn on/off creating a waveform cache when registering a clip to the Bin.

Create waveform cache in the project folder

Description: EDIUS now allows the user to create a waveform cache in the project folder, to maintain editing performance when editing clips stored on network storage or removable media.

Support for SONY XDCAM Station

Description: EDIUS now works with the Sony XDCAM Station deck.

EDIUS unexpectedly quits if a waveform cache is displayed

Description: EDIUS would unexpectedly quit if a waveform cache was displayed on the timeline.

Cannot import/export a QuickTime file if 2-byte character is used in the file name

Description: EDIUS could not import/export a QuickTime file if QuickTime has been updated to 7.7 and a 2-byte character is used in the file name.

Cannot print to SxS media

Description: EDIUS could not print to SxS media if the media was formatted by an XDCAM EX v1.28-supported camera.

Partial transfer of HQ MXF clip does not work

Description: Partial transfer did not work for HQ MXF clips.

Multiple clips cannot be restored

Description: When restoring multiple clips, only the last clips would be restored.

EDIUS unexpectedly quits when running audio normalize

Description: EDIUS would unexpectedly quit if running audio normalize while playing back multiple audio channels.

Partial transfer settings not saved

Description: Partial transfer settings in User Settings screen would not be saved if modified.

Cannot save PinP settings as a user preset

Description: Picture-in-Picture settings could not be saved as a user preset.

EDIUS unexpectedly quits when pressing Ctrl+Shift+Alt+F key

Description: EDIUS would unexpectedly quit when choosing multiple clips with multiple video filters and then pressing Ctrl+Shift+Alt+F key.

Incorrect wave file information

Description: Captured wave file would have incorrect information.

EDIUS unexpectedly quits when downloading XDCAM high-resolution data

Description: EDIUS would unexpectedly quit when downloading an XDCAM high-resolution data via Source Browser.

Start timecode of time line sequence is incorrect

Description: Start timecode of a time line sequence incorrect if the timeline contains K2 List or Program which has drop-frame based timecode.

EDIUS freezes when capturing HDCAM or XDCAM with STORM 3G Elite

Description: EDIUS freezes when capturing footage from HDCAM or XDCAM via the STORM 3G Elite HD-SDI port.

EDIUS shows an error when running automatic detection while ingesting K2 clip

Description: EDIUS would return a "Capture failed" message if ingested K2 clips registered to the Bin have been sub-divided into three clips or more.

KNOWN ISSUES

Disc Burner cannot burn a DVD with linear PCM audio

Description: If linear PCM is chosen as the audio encoding format, encoding stops.

Workaround: Select Dolby AC-3 or MPEG-1 Audio Layer II as the audio format.
