*** Dolby Digital Pro/Plus option required for EDIUS Pro (included in EDIUS Elite)*

Update History

The following issues are fixed or improved in this version.

EDIUS crashes if network connection is disconnected

Description: EDIUS crashes if network connection to an FTP server is disconnected while exporting a GXF clip to K2.

Preview screen shows black frame if blend keyer is disabled on clip

Description: If any timeline clip has blend keyer disabled, the preview screen turns black, even though other tracks are enabled

Exported DNxHD clip does not have timecode

Description: If the timeline is exported to a DNxHD clip with smart rendering, the exported clip has no timecode.

EDIUS does not detect certain P2 cards

Description: EDIUS does not detect some P2 cards inserted into the Panasonic AU-XPD1 P2 card reader.

KNOWN ISSUES

Analysis of Stabilizer effect always runs as a normal priority job

Description: Video analysis for the Stabilizer effect always runs as a normal priority job, even when set to run as a background job

Workaround: None

EDIUS imports proxy clip as normal asset

Description: When a proxy file is created using the Create Proxy menu in the Bin, and the asset folder is then chosen to load the clip into the Bin, EDIUS imports the proxy file as a normal resolution asset

Workaround: None

Playback of exported XAVC S clip stops on output monitor

Description: If the timeline is exported to an XAVC S file using Super fine video quality settings, playback of the file stops on the video output monitor.

Workaround: Choose Normal or High Speed video quality settings in the XAVC S file exporter.

DESIGN LIMITATIONS

Projects are cleared from the Most Recently Used list

Description: After upgrading to EDIUS 7.40, recent projects that were displayed in the startup screen are cleared from the list (but are NOT deleted from the PC)

Workaround: None
