United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Authorized Support Representative

To locate the support representative for your country, visit the Product Support webpage on the Grass Valley website: www.grassvalley.com/support/contact.

Important Notification

EDIUS 7 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires the installation of TWO Security Updates on Windows 7 in order to install Grass Valley hardware.

They MUST be installed in the following order:

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, EDIUS installer will ask you to install the security updates.

Update History

The following issues are fixed or improved in this version:

- EDIUS crashes while editing on the timeline if Blackmagic Design hardware is used as the preview device. (SFDC00475853)
- Keyboard shortcut that is assigned for [View] > [Pause Field] is inverted between upper and lower fields. (SFDC00513071)
- EDIUS sometimes freezes if a sub-folder in a tree structure is deleted in the Bin. (SFDC00515539)
- Incorrect timecode information is saved with a captured clip if video is captured in XDCAM MXF-compatible format. (SFDC00506274)
- Trimming a clip works slowly in Overwrite mode. (2nd phase fix for further performance improvement) (SFDC00509871)
- Video block noise appears while playing a clip. (SFDC00495033) (EDIUS XS only)
- EDIUS freezes while editing on the timeline. (SFDC00515710) (EDIUS XS only)

Known Issues

Stabilizer analysis always runs as a normal priority job

Description: Video analysis for the Stabilizer effect always runs as a normal priority job, even when set to run as a background job

Workaround: None

EDIUS imports proxy clip as a normal asset

Description: When a proxy file is created using the Create Proxy menu in the Bin, and the asset folder is then chosen to load the clip into the Bin, EDIUS imports the proxy file as a normal resolution asset

Workaround: None

Playback of exported XAVC S clip stops on output monitor

Description: If the timeline is exported to an XAVC S file using Superfine video quality

settings, playback of the file stops on the video output monitor.

Workaround: Choose Normal/High Speed quality settings in the XAVC S file exporter.

Design Limitations

Projects are cleared from the Most Recently Used list

Description: When upgrading to EDIUS 7.40 or later, recent projects that were displayed in the startup screen are cleared from the list (but are NOT deleted from the PC). **NB: this limitation does not apply when updating from 7.40 to subsequent updates**

Workaround: None
