- Worldwide Technical Support: [Please use our online form](#)

Phone Support

Use the following information to contact product support - for warranty and support contract customers ONLY.

| | |
|------------------------------|----------------------|
| United States/Americas | +1 801 222 5204 |
| Europe, Africa & Middle East | +44 (0) 20 8867 6305 |
| Asia (except China/Korea) | +86 21 5869 8668 |

Authorized Support Representative

To locate the support representative for your country, visit the Product Support webpage on the Grass Valley website: www.grassvalley.com/support/contact.

Important Notification

EDIUS 7 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires installation of Windows 7 updates in order to use Grass Valley hardware. There are following two ways to support SHA-2 code signing:

Obtain the latest update (recommended)

Obtain the latest update from Windows Update

Install two security updates

Install TWO Security Updates on Windows 7. Download stand-alone installer files from Microsoft website then run the installer. They MUST be installed in the following order.

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, EDIUS installer will ask you to install the security updates.

Update History

The following issues are fixed or improved in this version:

- Growing clip playback stops in EDIUS player window (only EDIUS Elite) (SFDC00531328)
- AVC-I 50 clip playback stuttering (SFDC00521789)
- Unable to set current TC in Layouter effect control window (SFDC00480239)
- Off-line hash is not drawn when loading FCP XML (SFDC00483463)
- Placed clip becomes off-line in certain clip copy steps (SFDC00544223)
- Disc Burner fails to burn DVD (SFDC00548391)
- An error occurs when printing certain timeline to tape (SFDC00547511)
- Default exporter cannot be copied via user profile export/import (SFDC00560049)
- When playing a clip, audio scratch noise appears on Storm Pro analog audio output (SFDC00522588)
- Storm Pro outputs video noise (SFDC00510474)
- EDIUS picks incorrect part of CC (Closed Caption) from K2 clip (only EDIUS Elite) (SFDC00549595)

Known Issues

Stabilizer analysis always runs as a normal priority job

Description: Video analysis for the Stabilizer effect always runs as a normal priority job, even when set to run as a background job

Workaround: None

EDIUS imports proxy clip as a normal asset

Description: When a proxy file is created using the Create Proxy menu in the Bin, and the asset folder is then chosen to load the clip into the Bin, EDIUS imports the proxy file as a normal resolution asset

Workaround: None

Playback of exported XAVC S clip stops on output monitor

Description: If the timeline is exported to an XAVC S file using Superfine video quality settings, playback of the file stops on the video output monitor.

Workaround: Choose Normal/High Speed quality settings in the XAVC S file exporter.

Design Limitations

Projects are cleared from the Most Recently Used list

Description: When upgrading to EDIUS 7.40 or later, recent projects that were displayed in the startup screen are cleared from the list (but are NOT deleted from the PC). NB: this limitation does not apply when updating from 7.40 to subsequent updates

Workaround: None
