- Worldwide Technical Support: [Please use our online form](#)

### Phone Support

Use the following information to contact product support by phone during business hours. After hours phone support is available for warranty and contract customers.

United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

### Authorized Support Representative

To locate the support representative for your country, visit the Product Support webpage on the Grass Valley website: [www.grassvalley.com/support/contact](http://www.grassvalley.com/support/contact).

## Important Notification

EDIUS 8 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires the installation of TWO Security Updates on Windows 7 in order to install Grass Valley hardware.

They MUST be installed in the following order:

1. [Security Update for Windows 7 for x64-based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-based Systems \(KB3033929\)](#)

If they have not been installed, EDIUS installer will ask you to install the security updates.

## New Features of Version 8.10.188

*This update provides the following additional features:*

- Start new project using preset or template
- Support for use with Windows 10
- Support for RED metadata import
- Support for the latest generation Intel processor (Sky Lake) for encoding / decoding accelerated by Quick Sync Video

## Update History

*The following issues are fixed or improved in this version:*

### **EDIUS**

- STORM Pro does not capture SDI embedded audio
- STORM Pro does not capture analog audio
- Audio noise from STORM Pro when switching between Player and Recorder window in EDIUS.
- If certain SMPTE effects are applied to a clip or clips, edge noise appears
- Intel Quick Sync Video does not work for printing to file if Intel HD graphics driver is updated
- Soft edge does not work in the Layouter if it is applied at the outside of clip
- User preset is not saved in an alpha custom effect
- Mask shape cannot be edited by using Bezier curve in Mask filter
- EDIUS crashes if Burn to Disc menu is selected in a 4K project
- Decode performance of DNxHD has been improved
- Decode performance of Apple ProRes has been improved
- Performance of encoding to AVC-Ultra has been improved

## GV Browser

- GV Browser starts up slowly
- GV Browser freezes when exiting GV Browser application
- GV Browser freezes when playing certain MOV clips
- If a clip that has a comment that is registered from GV Browser to the EDIUS Bin, the comment is not displayed in the registered clip
- Seek response for video clip preview has been improved
- Imported clip does not have metadata that is added when importing clip
- Full-screen preview always runs on the primary monitor if two monitors are connected
- GV Browser crashes if the verification result of the card copy dialog is closed by clicking the [X] button
- GV Browser crashes if certain folders are refreshed in the folder tree
- Sort function does not work for the GV Browser folder in EDIUS Source Browser
- Comments and tags are not updated in EDIUS Source Browser even though they are updated in the GV Browser application
- EDIUS does not respond if refreshing the GV Browser folder in the EDIUS Source Browser

## Known Issues

### Another EDIUS ID can be registered

*Description:* If an EDIUS ID is created and an EDIUS serial key is activated and attached to that ID, and another optional serial key is subsequently added (for example, a DNxHD license), it is possible to manually change the EDIUS ID at that point. This is a design flaw in the system – you should NOT change the EDIUS ID, because this will confuse the GV License Manager and EDIUS will not start.

*Workaround:* None
