### Phone Support

Customers with service contracts can use the following numbers to call support.

United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

## Important Notification

EDIUS 9 requires SHA-2 hash algorithm code signing to be active Grass Valley hardware driver. All versions of Windows 7, Windows 8.1 and Windows 10 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires installation of Windows 7 updates in order to use Grass Valley hardware. There are following two ways to support SHA-2 code signing:

### **Obtain the latest update (recommended)**

Obtain the latest update from Windows Update

### **Install two security updates**

1. [Security Update for Windows 7 for x64-Based Systems \(KB3035131\)](#)
2. [Security Update for Windows 7 for x64-Based Systems \(KB3033929\)](#)

If they have not been installed, installed Grass Valley hardware may not work.

## New Features of Version 9.51.5532

*This update provides the following additional features:*

### **EDIUS**

- Support to output ancillary data from supported Blackmagic hardware in 8bit project

## Update History

*The following issues are fixed or improved in this version:*

## **EDIUS**

- EDIUS freezes when closing Stabilizer's setup dialog after In/Out rendering
- Nest sequence has incorrect TC (SFDC00703120)
- Audio playback of a certain mov file (SFDC00710416)
- Exported AAF has wrong audio
- EDIUS freezes if effect is disabled/enabled while VAR playback (SFDC00709309)
- EDIUS creates MPEG2 MXF clips unable to be played in 3rd party player (SFDC00708668)
- Y curve unexpectedly changes when re-opening Primary Color Correction (SFDC00711441)
- Roll Title can't be edited
- Source timecode burned-in to an exported file is affected by output timecode setting (SFDC00700929)
- Unnecessary key frames appear in Color balance effect (SFDC00712530)
- Warning message appears Incorrectly when syncing clip which has no audio
- GV License Manager fails to create ID files for offline activation if the target is the root directory
- When you change the selection of exporter, combo-box of closed caption type has been flickering
- EDIUS crashes when rendering certain video clip
- Videoscope crashes when mount clip to Player whose width is not video standard

## **Mync**

- Thumbnail view type changes when deleting a storyboard
- FCP xml exported by Mync loses information about linked video and audio
- Storyboard preview shows red checkerboard pattern on the end of sequence
- Clip count does not tally between Explorer Panel and View Browser when create storyboard using unregistered clip

# **Design Limitations**

## **EDIUS & Mync**

### **Restrictions after Uninstallation of QuickTime for Windows**

The following functionality will be lost if QuickTime is uninstalled:

- Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image
- MOV Video File Formats: M4V or some MOV file formats
- MOV Video File Formats: 3GP; 3G2 (export)
- Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio
