

T2 Express/Pro/Elite Software Update Instructions

This document describes how to update your T2 software to the latest version using files that can be downloaded from the Grass Valley website. Please refer to this document to update the T2 software correctly.

IMPORTANT NOTIFICATION

This update applies ONLY to T2 Express/Pro/Elite models; it cannot be applied to the T2 Classic series.

Preparation

1. Create a 'T2_v221' folder on your PC and then extract the downloaded file in this folder.
2. Copy this folder onto the root of a USB storage device (memory or hard disk).
3. Connect a keyboard and mouse to the T2.

Start T2 in Maintenance Mode

1. Start the T2 in Maintenance Mode.
2. Touch or click the Password Entry field, enter 'admin' as the password, and then click [OK].
3. A confirmation message will appear. Click [Yes].
4. T2 will restart in Maintenance Mode and the maintenance tool will start automatically.

Update the T2 Software

1. Choose [Start] > [My Computer] and open the 'T2_v213.1910' folder on the USB storage device.
2. Double-click 'T2v2Updater.exe'. The software will be updated automatically.
3. Click the [Yes] button in the Restart Required dialog box to launch the file update. T2 will restart in Maintenance Mode.

NOTE: If you click the [No] button, you need to restart in Maintenance Mode **manually** before starting the T2 in Command Center mode. If this step is skipped, the T2 may not work properly.

4. Restart the T2 in Command Center mode.
